| <b>City of San Fernando</b> | <b>80.5%</b> | <b>20.1%</b> | <b>5.9%</b> | <b>9.2%</b> | <b>4.5%</b> | <b>4.1%</b> |       | <b>4.0%</b> | <b>5.4%</b> | <b>1.6%</b> |

**Participation Rate in Community Affairs.** Citywide, 69.2% of households regularly participate in church affairs or, at least, attend church services while 26.3% disclosed church involvement once in a while (Table 26). The other 4.6% admitted not participating in or attending church services at all.

The highest regular church participation rate is in Sta. Teresita at 81.5% while the lowest were recorded in Calulut (54.8%) and Northville (56.6%). On the other hand, the highest non-participation rate is in Maimpis (11.4%) and Del Pilar (10.3%).

The level of church participation of a household is indicative of its extent of community service and the quality of life its members have. The relatively high church participation rate in the City indicates that, collectively, Fernandinos are reasonably involved in community development as many such projects emanate from religious organizations.

In terms of barangay or organizational/associational affairs, 33.7% of households are regularly involved and 35.2% are “sometimes” involved. A high 31.1% do not at all participate in these affairs. The highest rates of regular community participation are found in San Felipe (57.3%) and Sto. Rosario (53.3%); the lowest are reported in Calulut, Telabastagan and Del Pillar at around 25%. Nil participation in community affairs are highest in Lara, Lourdes and Magliman with more than 40% of their respective households that are not at all involved.

Community development begins at the grassroots. Campaigns and programs to foster greater community involvement by residents must be planned at the barangay level. Partnerships with the private sector, including the education sector, may be explored as means to entice community members to get involved. It should be noted, however, that the poor generally do not to participate in community affairs. In relation to this, Kremer and Gugerty (2010) stressed that “The poor and disadvantaged are widely seen as having weak organizations and low rates of participation in community associations, impeding their political representation and economic advancement.” This would call for community programs that have **preferential** treatment of the poor, i.e., the poor should be at the top of the line in development programs.

**Table 26**

**Participation in Church, Social and Community Affairs**

| Barangay                    | Joins, Attends or Participates in Church Activities<br>(Sumasali/Nagsisimba sa kinaanibang relihiyon) |                       |               | Participates in Barangay or Association/Organization Affairs<br>(Dumadalo sa pagtitipon ng barangay o samahan) |                       |               |

**Problems Encountered by Households.** Table 27 shows that, as expected, unemployment and lack of monetary resources are the most common problems encountered as disclosed by 53.2% of households. Contracting diseases or sickness is another problem that bothers 19.4% of households. Incidence of household conflicts (4.6%), domestic violence (0.6%), drug addiction (0.4%), no own house or shelter to live in (1.9%), alcoholism (1.4%) and lack of peace and order (1.5%) were also cited as problems encountered by households.

San Felipe and Dolores account for the highest incidence of family or household conflict at 9.6% and 11.4%, respectively. San Felipe likewise posted the highest incidences of domestic violence (4.2%), drug addiction (2.4%) and alcoholism (6.0%). The same barangay also has the highest percentage of shelter problem at 9.0%.

Enormous researches have shown the link between drug addiction and alcoholism, and domestic violence and household conflicts. Many incidences of domestic violence and conflicts result from either substance abuse or alcoholism or both. Thus, the fight against drug syndicates, drug addiction and alcoholism would significantly contribute in developing harmonious family relationships. Multi-sectoral involvement (churches, schools, etc.) in solving common household problems is another effective option for the City government.

**Agencies or Persons Approached when Experiencing Household Problems.** Table 28 indicates that households encountering domestic problems typically seek help from relatives (40.3%) and from barangay officials (12.9%). Households also find help from friends (8.4%) and neighbors (4.5%). At proportions up to 1.2%, they also seek assistance from city officials, provincial officials, congressman, other government officials, DSWD, religious group, association, and health workers.

Household behavior does not differ significantly across different barangays in terms of seeking assistance when encountering domestic problems.

The conspicuous presence and availability of agencies, including barangay offices, in dealing with community members experiencing grave problems can ease the members' plight. For example, women's desks are now common since women or their children are more likely the direct victims of domestic problems.

**Table 27**

**Domestic Problems Encountered by Households**

| Barangay                    | Unemployment/<br>Financial Inadequacy | Sickness     | Household / Family Conflict | Domestic Violence | Drug Addiction | Alcoholism  | Lack of own shelter or house | Risky Surrounding |
