SX MODEL

Shown in Satin Black

ebike** SX** - The beginning of
a new revolution

Want more power? With 36 volts of power and efficiency, a top speed of up to 18 mph (Off-Road Mode) and 15 mph (Road-Mode), a range of over 20 miles, and able to climb 15% grade, the **e**bike**** will get you where you need to go. The 36 volt **e**bike**** is especially designed for hill climbing and **added acceleration**.

It's what you want the next level of **e**bike**** to be. This distinctive integration of car-like features raises personal transportation to a new level. the agility and handling will exceed your expectations.

This **e**bike**** is the most advanced vehicle of its kind with all the **safety and ingenuity** to move from theory to reality.

The 36V **euro e**bike**** range has been specifically designed to comply with existing UK and European electric bicycle laws.

LE SX FEATURES

DESCRIPTION

• • 36 Volt Alloy Hub Motor	36 Volt Alloy Heinzemann Hub Motor; Aggressive acceleration and torque for crossing streets quickly and preventing stalls on steep hills - 200 watt variable output and 500 watt Max output
• • Road and Off-Road Options	Road Mode: Top speed over 15 mph (24 kmph). This mode activates only when pedaling. Off-Road Mode: Top speed up to 18 mph (29 kmph) with maximum hill climbing and acceleration
• • Safety Feature	35 watt halogen headlight, LED brake light, electric horn and rear view mirror
• • Sealed Lead Acid Battery	Can be charged over 250 times for useful service life of over 5000 miles
• • Range	Up to 20 miles* (32 km) range with moderate pedaling, over 15 miles (24 km) range with no pedaling under good conditions and flat terrain. Actual range based on the weight of rider and terrain
• • Cruise Control	Provides ability to maintain consistent speed
• • Comfort Alloy Handlebar and Stem	Provides upright pull-back riding position for maximum hand, wrist, arm, and back comfort
• • Sport Alloy Handlebar and Stem	Provides a complementary balance between aggressive and comfortable riding positions
• • Gel Grips	Provides maximum grip and comfort
• • Front Suspension Fork	Zokes 65 mm of travel with adjustable compression dampening
• • Triple Clamp Fork Front Suspension Suspension	Zokes Nitro DH alloy triple clamp fork provides 75 mm travel and greater rigidity
• • Tektro Linear Pull Brakes	Strong reliable front and rear brake
• • Tektro Anti-lock Rear Linear Pull Brakes	Provides anti-lock capability with progressive hydraulic feel adjustable to rider preference
• • Diatech 185 mm Spiral Front Disc Brake	Efficient and progressive front braking used by professional downhill racers
• • Comfort Puncture Resistant Tyres	Molded-in front & rear increases puncture resistance
• • Super Sport Puncture Resistant Tyres	High-efficiency design with front and rear lining increases puncture resistance
• • Reflective Side Wall Tyres	Improves bike visibility at night
• • Double Wall CNC Machined Rims	Double wall design provides durability and strength. CNC machined side walls provide smooth and consistent surface for brake pads
• • Quick Release Front Hub	Provides quick and easy front wheel removal for transport or tyre repair
• • Touring Seat with Springs	Custom shape for enhanced comfort and support
• • Top Gel Contoured Sport Seat	Optimum comfort for aggressive riders
• • Suspension Seat Post	Maximises rider comfort by absorbing sharp impacts
• • Quick Release Seat Post Clamp	Allows quick and easy seat height adjustment to meet rider preference
• • Alloy Crank with Optimum Gearing	Lightweight design - 38T chain ring allows comfortable pedaling, up to 18 mph
• • Shimano Acera 7-Speed Derailleur	Provides reliable and accurate 7-speed gear shifting
• • Shimano Alivio 7-Speed Derailleur	Lightweight alloy design provides reliable and accurate 7-speed shifting
• • Shimano 14-28T Freewheel Gearing	Reliable and durable 7-speed gears provide excellent for hill climbing and top speed conditions
• • Sport Fenders	Front and rear fenders enhance aggressive SX styling and provide water and mud protection
• • Chromoly Frame	Durable yet lightweight design includes five-year transferable warranty
• • High Impact ABS Plastic	Extremely durable in all weather and vibration environments
• • Battery Pack Built-In Charger	Battery may be either in or out of ebike - fully rechargeable in 4 hours
• • Limited One (1) Year Warranty	All materials (except battery) and workmanship covered under warranty for one year - warranty transferable by original owner. Battery carries six-month warranty

*Range is determined by battery condition, load, wind, terrain, temperature and amount of pedaling
