## My guide for Ascension

Ok this is my Ascension Guide for the Main GateWars game. I'll be explaining what you'll need for each ascension. I may have some errors for the requirements. But I'll be giving some good calculators for your ascension, and info I have learned from the forum. Hope you enjoy ;)

Note that the information down below may not be accurate, I only class this as an estimate what you'll be needing for your ascension. The Calculators I have suggested may have more of an accurate requirement than I do.

## Why did I made this E-Book.

Although I didn't ascend 20+ times like some players did, I have decided to make this E-Book. For the reason why I've created this E-Book, is because some players suggested some links that may help me understand what I'll be needing for each Ascension.

I have created this E-Book for both a thanks to the players that helped me as well as helping other players to ascend.

## A few tips for EVERY Ascension

Yes I have suggest some of the ascensions already, but I realized I hadn't add some of the info you'll be needing in *every* ascension.

### Transferring resources:

After you got every thing needed for your ascension, and see you have more than the required resources, you can transfer your goods to a reliable player, so when you have ascended they could transfer the extra resources back. (good idea to have PPT on, so nobody will steal the resources when your transfer the goods, or holding them for someone)

Note about Transferring resources: I have done this a few times now. Instead of "giving" the resources to another player, trade the goods to the player. The player that is offered the trades has to leave the offers alone. **After** the player has ascended, the player that has been offered the trades will *reject* the trades, causing the player that has ascended to have their extra resources, without making the player that is holding the resources a good looking target to Attack and/or Raid.

Another tips for ascending:

As you already know, that some trained units are required for your ascension. That is why I have trained some units to Super Units. Not only you'll have some trained units that you'll need for your ascension, it'll boost up your rank. Mind you should do this before you have a 1000 G and R points. Also check an Ascension guide or calculator (like this one) for the Trained Units requirement first before training Units to Supers so you don't be screwing yourself for some extra UUs.

You may already know this but I'll say it again. When your going to ascend, don't forget that you'll losing all of your attack/defense weapons, this is the reason I suggest that you sell all your weapons and transfer that naq to a reliable player.

## **1st ascension (Prior)**

The 1st Ascension is one of the most Major Ascensions for any player. This Ascension will change your name of the race, the Units Names, the Weaponry names, and make your Units and Weapons Stronger.

Also note that you do not have no Unique Technology, your Second Ascension through your Seventh Ascension will be adding 1 level of Ascended Blessing, which is the Unique Technology.

Note about the Ascension Server:

Not only this is the first ascension, this is the time when you'll be signing up in the Ascension Server. Your user name and password will be the same as the Main GateWars when you join up to the Ascension Server, unless your going to change it, good idea for security reasons.

Requirements Are:

1000 G and R Points

999 UP (I've been told to keep the UP low to make your Ascension Cheap)

25 X unit production, in Untrained Unit's

10 X unit production, in Super Trained Units

and some naq, don't know how much, but a good way to get it is to sell your weapons, since your going to practically lose everything.

## **2nd ascension (Prophet)**

1 level of Ascended Blessing will be added.

Requirements are:

1000 G and R

1499 UP

30 X unit production in Untrained Unit's

15 X unit production in Super Trained Units

A small amount of naq

This ascension all the way to the last ascension will be similar to the first ascension, you be choosing TOLAH, ANJA, INDU and ORI, what you'll need to ascend, and so on and so forth. However, this will NOT take affect to the Ascended Server, even if you choose to follow another Ascended Server Race.

## **3rd ascension (Messiah)**

1 level of Ascended Blessing will be added

Requirements are:

1000 G and R

1999 UP

35 X unit production in Untrained Unit's

20 X unit production in Super Trained Units

a small amount of naq
