## De-worming Rotation

**Parasites:**

Parasite prevention is imperative to your horses' well being. Perform the proper fecal tests to determine what parasites are present. Treat for bots and tapeworm at least once a year. Rotate between active ingredients. Dose according to weight and ask your vet any questions that may arise.

**Signs of parasites:**

Distended belly or pregnant looking abdomen	Dull coat	Low energy level, dull attitude
Delayed or abnormal shedding	Colic and/or diahrea	Weight management problems
Abnormal growth and development	Unexplained coughing and signs of suppressed immune system	

**Paste De-wormers by chemical class**

Active Ingredients	Works against	Product (brands) (there may be others)
Ivermectin	Large and small strongyles, pinworms, hairworms, threadworms, stomach worms, lungworms, ascarids (roundworms), bots	Ivermectin Paste (Jeffers) Bimectin Paste Zimecterin Equimectrin Rotectin 1.87 IverEase
Ivermectin & Prazinquantel	Large and small strongyles, pinworms, hairworms, threadworms, stomach worms, lungworms, ascarids (roundworms), bots and tapeworm	Zimectrin Gold EquiMax
Moxidectin and Prazinquantel	Large and small strongyles, pinworms, hairworms, stomach worms, ascarids (roundworms), bots, encysted small strongyles and tapeworm	Quest Plus
Pryantel Pamoate	Large and small strongyles, ascaids (roundworms), pinworms	Exodus Strongid Rotectin P
Fenbendazole	Large and small strongyles, ascaids (roundworms), pinworms	Safe-Guard Panacur
Oxibendazole	Large and small strongyles, ascaids (roundworms), threadworms, pinworms	Anthelcide EQ
Pyranel Tartrates	Large and small strongyles, ascaids (roundworms), pinworms, tapeworms	Daily wormers
