

“Dr. Kumar Padmanabh is working as a research associate in SETLabs, Infosys Technology Limited, Bangalore. He is leading wireless sensor network research initiative. He has been the main architect of Elixir, a framework for rapid application development in wireless sensor network. He has published more than 20 research papers in international conferences and journal of repute and invented patent pending technologies.

Dr. Kumar Padmanabh earned his PhD degree from Indian Institute of Technology in 2006 in wireless sensor network area. He received his Bachelor of Engineering degree in Electronics and Communication Engineering in 2001 from MJP Rohilkhand University, Bareilly, India. He received the Master of Technology in Digital Systems from Moti Lal Nehru National Institute of Technology, Allahabad, India in 2003. He had worked in Bhabha Atomic Research Center, Mumbai, India for six months in 2002 and as a lecturer in Mody Institute of Technology and Science, Laxmangarh, Rajasthan (a deemed university) in 2003 before joining the electronics and electrical communication engineering department of I.I.T, Kharagpur as a research scholar (a full time PhD student) in August, 2003. He is listed in Marquis World Who is Who 2007. Kumar Padmanabh was among the finalists of Indian Mathematics Olympiad.

His area of interest is in Application of optimization, control, algorithmic and AI techniques in optimal resource allocation problems, Performance Analysis and Modeling of networking. Application of control theory, algorithmic techniques and detection/estimation techniques in network dynamics, network optimization and stability in wireless network in general and wireless sensor network in particular.”
