

Specialty Conference on  
THE CONCEPTUAL APPROACH TO STRUCTURAL DESIGN  
29 – 30 August 2001, Singapore

TABLE OF CONTENTS

Title of Paper / Authors

Keynote Papers

Conceptual design of buildings on steep slope  
S L Lee\*, S Swaddihudipong, S H Chew and Y K Chow

Conceptual design of structures in the developing countries of Asia, Africa, the Pacific and Indian Oceans  
C R Alimchandani\*

Conceptual design of 3D structures for BLOB architecture  
A C J M Eekhout\*

Precast concrete in mixed frame construction  
K S Elliott\*

Design and construction of underground carpark in Milan  
F Mola\*

Conceptual design of a concrete mix  
C T Tam\*

The art and science of bridge engineering – conceptual design  
M C Tandon\*

Technical Papers

Design of a steel truss with random parameters  
J O Afolayan\*

An investigation of steel rail & rail pad for a new low profile steel track system, LR55, treated as multilayer beams on elastic foundations  
H Al-Nageim\* and F Mohammad

Analysis & design of a prestressed concrete trough section for LR55 steel rail track system using non-linear optimisation technique  
H Al-Nageim\* and F Mohammad

Benefits of conceptual design for steel buildings: from Consultants (structural engineer and architect) point of view  
M Celikag\* and S Islam

An improved amplified sway method for rigidly jointed sway frames  
A H Chikho\* and P A Kirby

The structural design in the formation of the civil engineers  
N L Ercoli\*, M H Peralta and N F Ortega

The relationship between high rise concrete building configuration and seismic behaviour  
O Essiz\*

Concrete floor framing and services below and above floors on modern building  
O Essiz\*

Recent trends on composite modern building structures  
O Essiz\*

A conceptual approach to teaching structural design in architectural schools  
R Frances\*

Nature physical principles and structural models as education tools for the conceptual design of structures: case studies  
H U Guerrero\*

Educational software for structural engineering  
T Hayase\* and T Ichinose

Seismic isolation and architectural configurations  
A Parducci\*

Adaption process of historical buildings to new user requirements: a case of Warsaw post-war reconstruction  
A Z Pawlowski, P Trebacz and S Wrona\*

The effectiveness of wide column lumping method for preliminary design of high rise building  
S K Po\*

Mass proportional damping as a seismic design solution for an 18-storey concrete-core and steel-frame structure  
T Trombetti\*, S Silvestri and C Ceccoli

Seismic isolation as a viable solution for a 18-storey concrete-core & steel-frame structure  
T Trombetti\*, M Gattei and C Ceccoli

Drift-based design of transverse reinforcement for concrete columns  
Z H Xiong\*

Structural analysis exercises to assist in teaching conceptual design of structures  
M M Bakhoun

Precast frame concepts, architectural requirements and mixed construction  
K S Elliott

Precast concrete floor, beams and columns  
K S Elliott

Structural stability, floor diaphragms and progressive collapse  
K S Elliott

Instability limit state analysis of slender precast r.c. frames  
F Mola

Concrete bridges : special applications  
M C Tandon
