

2nd International Specialty Conference on

THE CONCEPTUAL APPROACH TO STRUCTURAL DESIGN

1 – 2 July 2003 – Milan, Italy

[Proceedings for this Conference are in 2 volumes – with isbn reference]

Vol. 1 –TABLE OF CONTENTS

- Preface
- Message
- Table of Contents

Keynote Papers

The influence of formwork technology on conceptual design of structures [abstract only]
C Carini and R Meroni

Conceptual design: a breath of inspiration or an indispensable process of rigorous, conscientious and deep search of the optimal solution
H Corres Peiretti*, J R Martin and A P Caldentey

Modern concepts for precast concrete buildings
K Elliott*

Conceptual design of efficient floor structures
G C Giuliani*

The use of high–strength rebars for high rise reinforced concrete buildings in Japan
H Imai* and J J Castro

What can structures do for human joy [abstract only]
M Kawaguchi*

Use of high strength concrete in tall building structures
A K H Kwan* and Y K Cheung

Updown construction of tall buildings
S L Lee* and S Swaddiwudhipong

Conceptual design of bridge structures: some examples
A Samartin* and J A Llombart

Concrete surface as exterior and interior finish [abstract only]
M Sugawara

Special Session

Architectural and structural design approach in the new quarter of Milano Bicocca

Structure and architecture: two aspects of the same problem [abstract only]

V Gregotti

Conceptual approach to structural design : some experiences in Pirelli–Bicocca Design

A Vintani

Special Session

Architectural aspects and structural of upgraded historical buildings

The architectural heritage of Dodecanese (Greece) built during 1912–1943

N Avramidou*

Reconstitution of the structural integrity and design premises of a concrete dam

T Cavalli* and P H Tsingos

Structural safety and maintenance conditions of the highway church by Giovanni Michelucci

S Chiostrini* and L Galano

Experimental analyses of two methods for estimating in–situ tensile force in tie–rods

L Facchini*, L Galano and A Vignoli

No–invasive geo–electrical methods as diagnostic tools to quick explore shallow sites of archaeological and civil engineering interests

G Finzi–Contini*

A conservative strengthening intervention on Palazzo Landi in Piacenza masonry vaults

G. Giacomini

Technical Papers

Some iron railway bridges of the 19th century in Italy: historical considerations and recent investigations

D Abruzzese, M Ferraioli, P Malangone* and A Zambrano

Structural behaviour of concrete beams reinforced with NEFMAC reinforcement

M M Aburawi* and A M Al–Rifai

Future of structural engineering

A K Aggarwal*

A Rational use of FRP rebars in designing of reinforced concrete flexural structures

M A Aiello* and L Ombres

A methodology for the structural analysis of concrete members reinforced with FRP rebars

M A Aiello* and L Ombres

The use of a nonlinear optimisation techniques for the design of a new light weight rail track system treated as a multilayer beams on elastic foundations

H Al-Nageim*

Structural conception and construction methods in the design of a segmental prestressed rc bridge

M Arici and M F Granata

Stability of physically and geometrically non-linear spatial composite rod systems

O D Astafiev* and I A Fedotova

Application of the quality assurance systems in the rehabilitation of the architectural heritage

N Avramidou*

Load path method in the conceptual design of R C structures

N L Baglivi, F Palmisano*

Behaviour of masonry walls subject to shear stresses and reinforced with FRCM

A Barbieri, G Mantegazza and A Gatti

Numerical analysis of prestressed concrete frames

R A Barbieri*, F P S L Gastal and A Campos Filho

Complete calculation of lame plinth at constant height

B Bartolozzi and F Bartolozzi*

Skew reinforcement design in reinforced concrete two dimensional elements

G Bertagnoli, V I Carbone, L Giordano and G Mancini*

HISTRIDE–An integrated software environment for dynamic structural calibration

L Bolognini and A Frigerio*

Special fibre reinforced cementitious matrix (CRCM) for the strengthening of reinforced concrete beams

M Calda, A Trimboli and G Mantegazza*

Seismic behaviour of exterior beam–column joints using mechanical anchorages

J J Castro*, H Imai and M Kikai

Shear strength in high performance reinforced concrete beams

S Cattaneo and G Rosati

Structural design for long span and high rise structures – structural design as a teaching subject

A Cauvin and G Stagnitto

Original aspects related to the structural design of the Arcimboldi theatre in Milan

G C Cerra, F Mola, G Parodi*, P Spinelli and A Vintani

Project for a P.C. exhibition pavilion

M Chersich, M Mandelli Contegni and S Valloni

Structural application of grc for precast floor

D Cian and B Della Bella*

Conceptual design of cable–stayed bridges

M De Miranda*

Widening of a historic multiple-arch concrete viaduct by integrated new fly-overs
B De Pauw and P Van Bogaert*

Performance based design of cable stayed bridges
S Di Bernardo*

A new concept in utilizing of continuous carbon fibre as reinforcing material for concrete structures
R Djamaluddin*, S Hino, K Yamaguchi and T Ohta

Learning structural design in an architecture class
B Dytoc*

Nonlinear behaviour of stepped shear walls
E A El-Shamy and Tharwat A Sakr

Behaviour of retrofitted RC beams with rectangular openings
M B H Emara and T A El-Sayed*

IZMIR – Karsiyaka tunnels and the problems encountered during the excavation
M E Ertem, C Tatar and H Kose

A conceptual design for a power cavern
A Fava* and L Zanelotti

Non metallic (MCP) fibre reinforced concrete: experimental results and slabs on grade design aspects
F Focacci* and G Mantegazza

Viscoelastic geo-structure seismological evolutions affecting Umbria and Molise areas for long periods
G Finzi-Contini*

Analysis of simplified methods to predict ultimate loads of slender HSC columns under eccentric loading
L Galano, G Lavacchini* and A Vignoli

Experimental study of the bridging of cracks with composite materials
G P Gamberini* and M Sanna

Vol. 2–TABLE OF CONTENTS

Technical Papers

Moment redistribution on steel–concrete composite beams

N Gattesco*, M Fragiaco, L Macorini and G Bincoletto

Effects of non–structural elements on the dynamic response of a P.C. bridge

C Gentile

A damage mechanics based model for brick–mortar interfaces

F Ghrib*

Structural evaluation of the launching process of the Chiapas Bridge

R Gomez*, C Montoya, J A Escobar, R Vera R and D Munoz

Interaction between sliding tendons in P.C. elements prestressed in two stages

F Giussani, F Mola and A Palermo

Behaviour of R C beams with strengthened openings in shear span

Y Hammad, G T Abdel–Rahman, S Abdel–Gawad Aly* and M Said

Landscape evaluation of green surfaces on river and road revetments by urban and rural citizens

Y Hosokawa*

Conceptual design in strengthening concrete bridges

G Ivanyi* and W Buschmeyer

Conceptual design in structural engineering: an evolutionary computation approach

R Kicing, T Arciszewski* and K de Jong

Performance–based seismic design of damage tolerant braced frame

J K Kim* and Y I Seo

Conceptual design approach for three different typologies of precast structures

S Knisel, J Mota, D Vacis and S Vacis

The design of prestressed reinforced concrete frame of high–pressure vessel

A Kubaneishvili* and M Lortkipanidze

Experimental and analytical study of dynamic behaviour of plain concrete subject to vertical cyclic load

A Kunugi, H Ma and E Tachibana*

Study of seismic vulnerability and subsequent retrofitting for Ganga Mahal, Banaras

S Lahiri, S Chandrasekeran*, V Kumar and U K Tripathi

Bearing systems for high speed railway bridges

A Marioni*

Structural concepts via tensegrity

I Markov*

Structural design to the architectural heritage: Considerations on the approach in two cases

T M Massarelli*

Structural recovery of the former sugar factory at Cavarzere
O Mazzearella* and A Casson

Reinforced concrete design: Technical and economic analysis
O Mazzearella* and M Geromel

Optimum structural configurations of seismic isolated buildings
M Mezzi

Padre Pio Church
M Milan*

On structural behaviour of GFRP – concrete elements subjected to axial load
S Minuzzo and S Russo

Construction investigation and repair of highway and railway bridges in Sudan
S E Mohamed Ahmed*

Precast R.C. frames assembled by post-tensioned tendons
F Mola, S Knisel, C Pagani, S Pampanin and S Zambelli

Long term behaviour of ventilated precast panels
F Mola, A Palermo and S Zambelli

Some additional arrangements to increase the punching shear capacity of reinforced concrete slab-column connections
A Moussa*

Behaviour of high strength concrete beams
A Moussa*, G Ghanem, A Salama and H Mamdouh

Conceptual approach to the structural design of graduate theses in the faculty of architecture
F Mutignani and E Siviero

Conservation and enrichment of environment
A Nandan* and F Rajak

Open problems in the design of irregular buildings
P Negro and E Mola

Design of irregular buildings: research activities
P Negro and E Mola

Nuovi Bastioni – a project for the improvement of the viability and standard of living in the city of Milan
G Parola

Design of reinforced concrete thick plate transition layer in high-rise buildings
B Peng, C C Li and X L Gu*

Conceptual design teaching: a combined degree course in structural engineering and architecture
O Popovic and A Tyas*

A new look at topology optimisation as an aid to conceptual structural design
T G Pritchard, A Tyas* and M Gilbert

Back analysis of one road tunnel in Prague
P Prochazka*, J Trckova and I Kamenicek

Stability in geotechnics using the free hexagon method
P Prochazka* and V Dolezel

Serviceability performance evaluation of reinforced high strength concrete beams
R Sato*, S Masaki, Y Hiramatsu and T Kodama

Conceptual design of two truss bridges
C K Seong*

Tetra-re-dimensioning of urban space
J Serrano*, N A Pecorari and V Serrano

An innovative damping scheme for shear-type structures – The MPD System
S Silvestri*, T Trombetti and C Ceccoli

Recent developments in the achievement of the reinforced concrete arch bridges with small or medium proportions
E Siviero*, E Giovanetti, L Attolico and P Garghella

New structural solutions for movable bridges based on past experiences
E Siviero, B Briseghella and T Zordan

Low heat development in self-compacting concretes for massive structures
R Troli, J J O Olagot, S Monosi, M Colleparidi* and S Colleparidi

Teaching conceptual structural design to undergraduate structural engineers
A Tyas*, University of Sheffield

The concept and application of tied arch bridges with radial converging hangers
P Van Bogaert* and L De Taeye

Structures in sculptures – the conceptual design
O Vanggaard*

Design and testing of the hangers for the bridge over the river Sieve for the Italian high speed railway
A Vittozzi*, A Marioni and M Merlino

The new dimensions in design of large and spatial structures
Z M Wang* and L Liu

A unique conical concrete tent roof – design and construction
R J Wheen* and P R W Wheen

Comparative analysis of earthquake responses of tube and suspension tall building structures
Y M Xia*, S X Wu and Z J Qu

Test research on prestressed concrete berthing pile
X B Xu*, X J Wang and Z R Tu

Proposal for a bridge over the river Brenta at Campo San Martino along the old Treviso–Ostiglia railway line
F Zanarella* and E Siviero

Optimisation of the high–strength superplasticized concrete of the Three–Gorge Dam in China
Y Zhang*, M Collepari, L Coppola, W Guan and P Zaffaroni
