

4th International Conference on
GROUND IMPROVEMENT TECHNIQUES
26 – 28 March 2002, Kuala Lumpur, Malaysia

[Proceedings for this Conference are in 2 volumes – with ISBN reference]

Vol. 1 – Table of Contents

Message from Professor Roger Hawkins
Message from Professor Pedro Sêco e Pinto
Message from Professor Luis Ribeiro e Sousa

-

Conference Special Lecture

Design and performance of fibredrain in soil improvement projects
S L Lee*, G P Karunaratne and M A Aziz

Keynote Papers

Applications of lime/cement columns in Malaysia
B B Broms

Modelling of prefabricated vertical drains in soft clay and evaluation of their effectiveness in practice
B Indraratna*, C Bamunawita, I W Redana and G McIntosh

Recent advances in jet grouting
R Katzenbach* and A Weidle

Development of pneumatic flow mixing method and its application to Central Japan International
Airport construction
M Kitazume* and T Satoh

The influence of marine soil structure on foundation treatment
L W Kong*, H B Lu, R Wang and A G Guo

From cobra swamp to international airport – the ground improvement at Suvarnabhumi International
Airport
Z C Moh* and P C Lin

Geoenvironmental aspects of chemically–based ground improvement techniques for pyritic mine
tailings
A M O Mohamed*

Ground improvement in transportation projects – from old visions to innovative applications
G A Munfakh*

Applications of geosynthetics for soil reinforcement
M I M Pinto*

Stability of sheet pile walls anchored in successive layers of sand and clay
A Abdel–Rahman*, O Mazen, M Abdel–Fadil and N Omar

Interpretation of plate loading tests on granular soils
F M Abdrabbo and K E Gaaver*

Control of ground settlement by stone columns – case study
F M Abdrabbo* and Z I Mahmoud

Prediction of the relative density of gravelly sand from plate load test results
F M Abdrabbo* and Z I Mahmoud

Design of foundation treatment for railway embankments
A Abdullah and A Arulrajah*

Rehabilitation of a failed embankment on peaty soil
F Y Addo–Abedi* and C D Antwi

Effects of weathering on engineering properties of Shemshak formation and its improvement
R Ajalloeian* and S D Mohammadi

The potential of tires rubber ash as a stabilising agent for selected problematic soil material
A S Al–Homoud*

Experience in improvement of off–grade soils at construction of impervious elements of dams
N F Aripov*

Application of ground improvement methods in Adapazari City after August 17, 1999 Marmara earthquake in Turkey
H Arman*, Z Gündüz, S Firat and M Kutanis

Technical and economical effect of soil improvement on design of flexible pavement
H Behbahanic* and M S Moosau

Mechanical improvement and its control of the earth dam materials
M Bilgin*, R Baki_ and G Yilmaz Ünal

The control of power losses at electrodes: the key to efficient electro–osmotic consolidation of soft clays
F Burnotte* and G Lefebvre

Analytical study on deformation characteristics of soil–nailed systems due to excavation
Y S Cho*, K Oda, T Matsui and Y Nabeshima

Application of copper slag as sand substitute of sand compaction pile
B S Chun, H C Jung, K M Kim and H Y Cho*

A case study on the application of CGM grouting on earth retaining in fill deposit
B S Chun* and H C Yang

Design of double track railway Bidor–Rawang on AuGeo piling system according to BS8006 and PLAXIS numerical analysis
N Cortlever* and H H Gutter

Forces in plastic vertical drains during installation
N Cortlever* and G Dijst

Experimental investigation of the combined soil stabilization with vertical columns In the laboratory
R Cudmani, T Meier and W Schwarz

Massive ground freezing for jacked tunnel face stability, Boston central artery project
J F Donohoe, A B Corwin, P C Schmall and D Maishman

Compaction grouting and ground surface upheave
A M El-Kelesh, T Matsui, K Hayashi, H Tsuboi and H Fukada*

Improvement of collapsible loess soils from Eastern Europe: lessons from Bulgaria
D Evstatiev*, D Karastanev, R Angelova and I Jefferson

Geotechnical problems and soil improvement techniques related to building roads on deposits of organic soils in Poland
A Florkiewicz, A Wojtasik* and M Troc

Earthworks: poor ground or poor specification and conservative design
M W Frost, I Jefferson, J R Greenwood and I Smalley

The stabilization of Khon Kaen loess by means of fly ash and rice husk ash
W Gasaluck* and R Nantasarn

Beneficial use of ground improvement on a major design build transportation project in Salt Lake Valley, Utah, USA
K Gunalan*

Soil reinforcement used to arrest bearing capacity failure at a steel mill
K M Hall, K J Wissmann*, J M Caskey and B T FitzPatrick

An investigation on the behaviour of geocomposite drains in cyclic consolidation in NW of Iran
M Hashemi* and M R Ashkbusi

Effect of sand piles on totally and partially confined swelling parameters of clay
F A Hassona*, M A Hassan, A M Aboubakr and R I Melek

Improvement effect of prefabricated vertical drain to peat ground
H Hayashi*, J Nishikawa and T Egawa

Vol. 2 – Table of Contents

- Evaluation of lightweight materials as geo-inclusion in reducing earth pressure on retaining wall
H Hazarika*, S Okuzono, Y Matsuo and K Takada
- 64m-high-filling of Wanzhou Airport construction in Chongqing
Z Y He and X Feng*
- Facing connection strength of a geosynthetic mechanically stabilised earth wall
Y A Hegazy*
- Suitability of deep mixing technique to offshore calcareous soils in Australia
M A Ismail* and J Parthezius
- Study of dynamic compaction method via physical modelling tests
F Jafarzadeh and A Barat
- Numerical study of propagation grout in sands
L Jason, N Saiyouri and P–Y Hicher
- Geotechnical and environmental input during planning, design and execution
R Katzenbach*, A Fehsenfeld and A Weidle
- Deformation properties of a treated soft silty clay
P S Kwan* and A Bouazza
- Settling and consolidation behaviour of soft soil under the influence of electrokinetics
M H Lee*, G C Sills and M Kamon
- Case histories and design of floating foundations with Geopier[®] rammed aggregate Pier[™] elements
B H Lien*, N S Fox, E M Morales and K K Han
- Working period of blended binders for subgrade stabilisation
P Lindh*
- Effect of cementitious grouts on strength properties of alluvial deposits
A Majdi* and A Aalee
- Quality assessment of grouted alluviums by water pressure test
A Majdi* and F Mahmoudi
- Successful application of Vacuum Consolidation[™] method to Nakdong River soft clay in Kimhae, South Korea
F Masse*, K Yee and S Varaksin
- Design and performance of steel sheeting pipe cellular cofferdams on deep soil–cement foundation
J J G Maswoswe*
- Design and performance of a frozen ground excavation support system
J J G Maswoswe* and D K Chang
- Designing geosynthetic reinforced soil structure using a strain energy approach
A McGowen* and J Kupec

Stabilization of the subsoil with using stiff integral geogrids
L Mica*

Cyclic pullout tests of geosynthetics under cyclic overburden pressure
Y Nabeshima* and T Matsui

Observation results for the embankment on soft ground improved by deep mixing Method and plastic board drain method
H Oodaira*, H Hashimoto, K Goto and M Nodu

Geocomposite method of weak soil compaction and reinforcing
V I Osipov*, S D Filomonov and O N Eremina

Geojet® –Turbojet® and Limix™ recent application of deep mixing methods for the solution of geotechnical problems
F Pagliacci*, A Bertero, M Siepi, T Forsberg and H Eriksson

Ground improvement engineering at the Norfolk International Terminal
F Pepe*, G A Munfakh and J Jones

Deep dynamic compaction trials at Al Khiran, Kuwait
J Philips*

Verification of deep mixed soil cement columns using geophysical techniques
A Porbaha*

Vibro replacement for high earth embankments and bridge abutment slopes in Putrajaya, Malaysia
V R Raju*

Potentialities of bamboo–coir composites for slope stability
T S Ramanatha Ayyar* and M S Girish

Electrokinetic stabilisation of a silty clay soil
C D F Rogers*, J E Barker, D I Boardman and J Peterson

Appraisal of granular cushions with geotextiles on expansive soil subgrades
C N V Satyanarana Reddy* and N V Rama Moorthy

Blow counts of collapsible soil strata
A O Sabbagh*

Flyash – a construction material in rural roads
P V V Satyanarayana, R Rama Rao* and C V Krishna Rao

Dynamic compaction of loose Sabkha deposits for airport runway and taxiways
C J Serridge*

Geogrid micro–mesh reinforced granular trench
F Shamsher*

Prediction of ground settlement and site management of ground improvement works for the 2nd phase project of the Kansai International Airport
M Shinohara and D Oyaizu*

Site response of improved ground in the coastal Eastern United States
T C Siegel*, W M Camp III, C C Chang and M Loizias

Performance of vibro stone column foundations under triaxial loading
V Sivakumar*, J McNeill and A Coyle

Bearing capacity of two-layer soil systems beneath rigid footings
B R Srinivasa Murthy, A Sridharan and P Vinod*

Performance of geosynthetics in expansive soils
V K Stalin*

Behaviour of lime – flyash – sand – clay mixed columns in the improvement of soft ground
V K Stalin*

Applicability of resistivity method for the quality evaluation of mechanical deep-mixing soil stabilizing method
M Tamura, S Hibino, M Fujii, A Arai, Y Sakai and M Kawamura*

Evaluation of lateral resistance of foundation pile in complex ground improved by deep mixing method
K Tomisawa*, J Nishikawa and Y Saito

Role of coir fibres in precompression of sand beds
P Vinod* and M Raji

A framework for stabilisation of lateritic soils by sand mixing
P Vinod* and M Manoj

On- and offshore vibro compaction for a crude oil pipeline on Jurong Island, Singapore
J Wehr and V R Raju*

Performance of a three-tiers geosynthetic – reinforced residual soil slope
J Wei, K Q Ho, W H Ho, S K Lim, S H Chew*, G P Karunaratne and Y T Seah

First results of settlement correction of road embankments without traffic interruption
B G H M Wichman*

Improving global stability and controlling settlement with Geopier[®] soil reinforcing elements
K J Wissmann*, B T FitzPatrick, D J White and B H Lien

Strength and deformation characteristics of cement-stabilised soil cured under an overburden pressure
T Yamamoto, M Suzuki*, S Okabayashi, H Fujino, T Taguchi and T Fujimoto

Performance of road embankment on vacuum consolidated soft clay in Bangkok
K Yee*, D Jullienne, F Masse and S Varaksin

Exploration on the effects of blast densification method on sandy soils
C H Yu*, F Jeng and T Ho

Design, execution and assessment of the performance of vibrocompaction works at Penny's Bay Hong Kong
D Johnson and J-M Debats

Strengthening of alluvial soils by rammed stone columns for LPG mounded storage facilities
Chandra Prakash, V V G S T Ramakrishna, A K Sharma and P C Rastogi

Index of Authors

Table of Contents of previous conferences held in 1997, 1998 and 2000
