

3<sup>rd</sup> International Conference on

LANDSLIDES, SLOPE STABILITY & THE SAFETY OF INFRA-STRUCTURES

11 – 12 July 2002, Singapore

## Table of Contents

### Messages

- Professor M E Popescu
- Professor Dr H Brandl

### Table of Contents

### Keynote Papers

Infrastructure projects in landslide-prone areas  
H Brandl\*

Modern approaches for assessment and management of urban landslides  
R Chowdhury\* and P Flentje

Influence of vegetation on stability of slopes  
Faisal Ali\* and S S Barakhbah

Recompacted loose fill slopes – performance and issues  
K T Law\*

Landslide causal factors and landslide remedial options  
M E Popescu\*

LEM-based progressive failure analysis and its application to nail-reinforced slopes  
T Yamagami\*, J C Jiang and S Yamabe

### Technical Papers

Failure of a cantilever retaining wall – case study  
F M Abdrabbo\* and K E Gaaver

A new robust device for the identification of potential slip surfaces  
A Akbar\* and B G Clarke

Fracture mechanics approach to the numerical simulation of a rock fall  
G Amatruda\*, M Castelli, J D Rouiller and C Scavia

Search algorithm for minimum reliability index of earth slopes  
G Bhattacharya\*, D Jana, S Ojha and S Chakraborty

Two sliding zones stabilised through siphon drains  
S Bomont\*

Repairing road embankments in mountainous terrain with polystyrene  
R Brown\*

Comparisons between limit equilibrium method and finite element method of slope stability analysis  
F Cai\* and K Ugai

Some aspects of finite element analysis of rainfall effects on slope stability  
F Cai\* and K Ugai

The use of automated continuous Piezometer data in slope stability analyses in Hong Kong  
C M Corcoran\* and J W Hall

Mechanism of rain-induced failure in sandy slopes based on field stress path  
K Farooq\*, R P Orense and I Towhata

The prediction of landslide time to failure – A state of the art  
A Federico\*, C Fidelibus and G Interno

A survey plan for landslide and rock-collapse warning in Three-Gorge Reservoir Region of Yangtze River  
X Feng\*, G Z Peng, Z Y He and G Q Zhang

FOS convergence investigation in using Gauss Quadrature instead of method of slices  
S Firat\* and R Delpak

Earthquake-induced Landslide of Hacimercan and its stabilisation by using piles  
S Firat\*, M Kutanis, H Arman and Z Gunduz

Slope failure along Lomsak-Chumpae Highway, Thailand  
K Fuenkajorn and P Thongthiangdee\*

Deformation and fracture of a slope caused by heavy rainfall  
T Fukuzono\*

Stability of man-made glacial till slopes in southwest Ireland  
K Gavin\* and P Jennings

Compressibility and recompression indexes of high plasticity clays under isotropic stresses  
Z Gunduz\*, S Firat. and H Arman

Studies on cut slope stability caused by variation of groundwater level  
B Han\*, H J Liao, L Zhang and M Akaish

The engineering geology investigation along the Khadangestan water conveyance tunnel, Central Iran  
M Hashemi\* and H Boor

Measured versus estimated anchor pullout resistance in soil and rock  
Y A Hegazy\*

The effect of load plate rigidity on the frictional behaviour at sand/geomembrane interfaces  
C W Hsieh\*, M W Hsieh and J H Chen

Effect of slope on strip footing behaviour  
M Jao\*, H C Chou, M Faruqi and M C Wang

Neural networks: a tool for the slope stability analysis  
S Jaritngam\*, S Chuchom, C Limsakul and R Jaritngam

Back analysis of strength parameters from slope failures with a weak layer  
J C Jiang\* and T Yamagami

Monitoring of the number 2 tailing dam of Dexing copper mine, China  
W D Jiang\* and X B Li

Triaxial Testing of residual soil  
I Jworchan\*

Improving of shear strength of natural clay liners from clay deposits NE Turkey  
E Kalkan and S Akbulut\*

A limit equilibrium stability analysis of slopes with two stabilising walls  
Y Kanda, T Yamagami\* J C Jiang and K Sumoto

Development of analytical and physical models to study the effectiveness of soil nailing technique for the stabilisation of slopes in Sri Lanka  
S A S Kulathilaka\* and D C A Mettanada

Estimation of unsaturated shear strength by hyperbolic formulation and ANN model  
S R Lee\*, S J Lee and B S Jang

Numerical analysis of a seismic response of the Sto e Landslide  
S Lenart\* and K Fifer–Bizjak

Dependence of the probabilistic evaluation of slope stability on the deterministic model  
D C A Mettananda and S A S Kulathilaka\*

Centrifuge static inclination model test on seismic stability of embankment slopes  
H Mori, Y Arai and H Nagatani\*

A new displacement–based design method for a new remedy of rope nets and rock bolts to stabilise natural slopes  
H Murakami, T Kaneko, H Kimura\* and S Razavi Darbar

Attempt on cone penetration test for an unsaturated silty soil in laboratory  
T Nishimura\* and H Toyota

Geological factors contributing to slope failure – Pos Selim Highway case study  
H Omar\*, M Daud, M B Zohadie, R AbMalik and S Maail

Prediction of a rock avalanche run–out through numerical modelling  
M Pirulli, C Scavia\* and C Troisi

The Application of Gray system in the prediction of landslide and deformation  
Y F Ruan\*

Study of natural disaster due to landslide in Bhutan Himalaya and impact on biodiversity and ecconomy  
Sadruddin Qazi\*

The geomorphological status of Ahar region with an emphasis on land instabilities of saydlar village

B Sari Sarraf\* and S R Raihany Nia

Residual strength and back analysis of slopes in Pierre Shale

V R Schaefer\*

A computational approach to analyse stability of natural compound slope of Uttarkashi Region, India

T N Singh, S Singh and M Khandelwal\*

Slope stabilisation by bio-technical 'net'

M Subic-Abd Rahman\*

Mechanism of shear zone formation and its effect in residual shear strength

B Tiwari\* and H Marui

Impact in residual shear strength due to the inappropriate sampling location during the stability analysis of landslides

G R Tuladhar\*, B Tiwari, H Marui and T Matsuzaki

Three-dimensional finite element analysis of landslide prevention piles

K Ugai\* and F Cai

Improving global stability and controlling settlement with *Geopier* soil reinforcing elements

K J Wissmann, B T FitzPatrick, D J White and B H Lien\*

#### Additional Papers

The use of automated continuous Piezometer data in slope stability analyses in Hong Kong

C M Corcoran\*

Study of the landslide in Min-Tan Power Reservoir

C L Hsu\*

Index of Authors

Contents of the 1<sup>st</sup> Conference held in 1994, Malaysia

Contents of the 2<sup>nd</sup> Conference held in 1999, Singapore

Opening and Closing Addresses by conference chairman
