

26th Conference on
Our World in Concrete & Structures
27 – 28 August 2001, Singapore
Volume XX (2001) : *With ISBN reference*

Table of Contents

Speech by Guest-of-Honour, Er Chua Koon Hoe

List of Papers/Authors

Conference 2001 Lecture

Service stage analysis of prestressed concrete bridges
*F Mola**

Keynote Papers

Self-compacting concrete: a quiet revolution
*P J M Bartos**

Concrete Technology in relation to the microstructure
*S Chandra**

Prefabrication – an answer to fast track concrete framed structures
*K S Elliott**

Non-Destructive Tests on normal and high strength concrete
S Lopes and M Neponmuceno*

The technique of imposed displacements for improving the structural behaviour of continuous composite steel-concrete bridges
F Mola, A Palermo and R Sicilia*

Introduction of JCI recent activities on concrete engineering
*H Noguchi**

Self-compacting concrete: development, applications and key technologies
*M Ouchi**

Ferrocement structural applications
*P Paramasivam**

Fast track construction of Delhi Flyovers
M C Tandon and R Goel*

Concrete in the hot and severe environment of the Arabian Gulf Region
*H Zein–Alabideen**

Technical Papers

Study of interlaminar stresses in laminated composites
K N Agrawal and S Sriram*

Mechanical properties of oil palm trunk fibre reinforced concrete
Z Ahmad, H M Saman, F M Tahir*

Epoxy modified Portland Cement Concrete at elevated temperatures
A Alkhaleefi, M M El–Hawary and H Abdel–Fattah*

Prediction of strength and ductility of confined high strength concrete
Antonius, D R Munaf and R Suhud*

Bridges with spatial cable system: effects on static and dynamic behaviour
D Azzaro and C Gentile*

A parametric study on the flexural behaviour of plain concrete beams strengthened by externally bonded plates
R V Balendran, A Nadeem, T Maqsood and T M Rana*

Effect of cooling method on residual compressive strength of high strength concrete cured for 28 days & 180 days and heated to elevated temperatures
R V Balendran, T Maqsood and A Nadeem*

Cubeinfo™ – the quest for building quality excellence
S K Chew, S Chia, Y B Teo and Vito*

Experimental analysis on the influence of curing and aggregates on HPC performance
*B de Nicolo and F Mistretta**

Seismic retrofitting of historic multiwythe stone masonry walls under out–of–plane loading
*T El–Sayed, G M Ghanem and A Salama**

Shear behaviour of precast prestressed concrete members
T Fukui, R Utida, M Hamahara*

Punching shear design of slab–column connections in irregular flat–plate structures
J Z Geng, S Teng and H K Cheong*

Dynamic testing of a curved cable–stayed bridge and numerical modeling for seismic analysis
C Gentile and F Martinez y Cabrera*

Bridge modal identification from short length ambient vibration responses
*C Gentile and A Saisi**

Evaluation of the Egyptian code for masonry for estimating out–of–plane flexure of masonry
*G M Ghanem**

Selecting an optimum axis for the concrete bridge arch
I Gukov, S Piculin and G Puz*

Experimental modeling of temperature rise of mass concrete by FDM method
*D S Guo, E Y Chen, G L Low and J L Yang**

Arch mechanism in reinforced concrete beams
M Hamahara, S Iida, R Uchida and H Suetsugu*

Fracture simulation of confined concrete by visco–elasto–plastic suspension element method
T Hiraiwa, Y Tanigawa, H Mori and S J Park*

Reinforced concrete elevated service reservoirs in earthquake prone region
S Hirde and S S Kulkarni*

Self–compacting concrete for Singapore
D W S Ho, A M M Sheinn, C C Ng, W B Lim and C T Tam*

Strengthening of Blanco Court using advanced composite materials
N Y Ho, M W Sim and Y K Chhabra

Shear–friction truss model for reinforced concrete beams
*S G Hong and T Ha**

Strut–and–Tie models for ductility required R C members
*S G Hong and S G Lee**

Creation of concrete products reusing melting slag from waste incineration ash
Y Hosokawa, Y Ohta, M Komura, K Sugawara and S Muramatsu*

Arch mechanism in prestressed concrete beams with web openings
S Iida, R Uchida, H Suetsugu and M Hamahara*

Integral bridge concept applied to rehabilitate an existing bridge and construct a dual–use bridge
*R Jayaraman**

Flexural strength and behaviour of bolted side–plated reinforced concrete beams
*C C Kankam**

Ferrocement components for low cost housing in developing countries
Kantharaju, K Vasudev, S Kulkarni, C V Chandrashekar, G Rajappa and N G Malji*

Seismic response of R C buildings with seismic strengthening elements using R C short column confined by steel tube
K Kikuchi, K Yoshimura, K Eto, K Mohri and Y F Chew*

Superplasticizers in high strength mortars for use in ferrocement works
P R Kumar, S Srinivasan, N E D Murthy and S S Jamkar*

Analysis of R C columns under cyclic axial compression with bidirectional eccentricities
T W Lai and J S Chang*

Performance of calcined pyrophyllite in lightweight expanded clay concrete
C G S Lauw and M S Besari*

Optimization of self–compacting HPC
*Y L Li and H Z Lian**

Mock-up test of HPC designed for Shenzhen Metro
*H Z Lian**, *X Y Lu*, *Y L Li* and *P Y Yan*

Practical approach to the safety classification of structural systems
X L Liu, *V S Kamara** and *C Liu*

The behaviour and analysis of reinforced concrete columns subjected to horizontal force
Y W Liu, *K C Liu** and *W J Huang*

Effects of sulphates on chloride binding and corrosion of GGBS concrete, paste and mortar
*R Luo**, *Y B Cai* and *C Y Wang*

Research on the stress intensity factor for base layer crack of pavement considering kinds of jointed conditions according to weight function theory
*R Luo** and *X M Huang*

Analysis of reinforced concrete tidal gate using STAADIII
*T A Majid**, *S Mohd*, *A B M Diah* and *T L Lau*

Considerations on long term durability of super quality concrete structures
*O Makishima**, *H Tanaka*, *Y Itoh*, *K Komada* and *F Satoh*

Time evolution of stress and deformation in incrementally launched P C bridges
*M Mapelii** and *F Mola*

Time-dependent behaviour of inhomogeneous R C structures: application to long term analysis of R C arch and arch-frame bridges
*E Mola** and *F Pigni*

Numerical and experimental studies on the behaviour of reinforced concrete frames
*A Moussa**, *S Abd Elnaby*, *H Hosny* and *M Ginidi*

Repair and strengthening of masonry walls with openings using FRP laminates
*A Moussa** and *A A M Aly*

Recent developments in fibre reinforced concrete and their effect on concrete columns analysis
*P Nibasumba** and *X L Liu*

Strengthening of a reinforced concrete column by steel fibre reinforced concrete jacketing: design and analysis
*P Nibasumba** and *X L Liu*

Development of a measuring method for bending strength and elastic modulus of micro region in concrete
*T Nishida**, *N Otsuki*, *S Miyazato*, *K Matsui*, and *W Yodsudjai*

Empirical formulae for the design of reinforced concrete skew slabs
*S M Nizamud-doulah** and *A Kabir*

Studies on behaviour of concrete beam reinforced by UCAS method
T Ohta, *R Djamaluddin**, *S Hino* and *A Ohta*

Fundamental studies on mechanical properties of UCCF cables for UCAS method
T Ohta, *K Yamaguchi**, *K Harada* and *K Samizo*

Impact resistance of fibre–reinforced laterized concrete
*G L Oyekan**

Technology of modern concrete – a practical approach and understanding for all participants – a pilot project
*E Pagliarella**

Effective use of reactive powder concrete in arch bridges
S Piculin, J Radic and I Gukov*

Shear tests of epoxy–modified concrete beams with stirrups
K N Rahal and M El–Hawary*

Approach to weighting factors of structural components based on reliability theory
H C Rong and J X Ma*

Studies on recovery technique of cementitious materials by freeze–drying method
R Sakurada, K Maruyama, I Kuroshima, H Takeuchi, J Z Yu and Y Kawazoe*

Quality improvement for the concrete industry: problems and challenges
*M K Sam**

A 32–year long durability study of a concrete pile
M Shonaka, T Mizunuma, D Hamada, S Motoki and Y Ikegami*

Early age behaviour of silica fume concrete
*D S Sidhu**

Studies on the thermal performance of ferrocement roofs
*J Sudhakumar**

Methods of repairing concrete structures
*J Sudhakumar**

Water–cement ratio law for fly ash concrete
M A Tahir and P Nimityongskul*

Flexural design concept for irregular flat–plate floors
Tavio and S Teng*

Failure modes of FRP–strengthened R C structures
*J G Teng**

Utilisation of phosphogypsum in cement concrete for strength and economy
R B Thakare, K G Hiraskar and O P Bhatia*

Structural analysis by surface deflection of concrete block pavement for roadways
Y Todoroki, S Iwai, Y Miura and K Arai*

Application of slag fine aggregates to produce self–compacting concrete
K Tokuhashi, M Shoya, M Aba and S Sugita*

Restoring force characteristics model for prestressed concrete frames
R Uchida, M Nakamura and M Hamahara*

Deterioration model of acid–rain–affected concrete and test results of ordinary and super quality concrete

H Ueda, Y Kimachi, S Ushijima and K Shyuttoh*

Study on the combined bending and shear behaviour of R C beam strengthened with FRP Composites

*Z H Wang**

Studies on performance of prestressed steel–concrete composite beams

W C Xue and J Li*

A study on bond properties between high strength deformed bar and super quality concrete

H Yamamoto, M Tetsuya, M Kikuchi and H Shima*

Experimental study on ultimate bond strength of deformed bars in R C members strengthened transversely with carbon fibre sheets

K Yoshimura, K Kikuchi, M Kuroki, H Takagi N Wakahara, T Koja and J Wang*

Experimental study on effects of reinforcing details on seismic performance of masonry walls

K Yoshimura, K Kikuchi, M Kuroki, H Nonaka, T Croston, S Koga, K T Kim, T Itai, Y Matsumoto & L Ma*

Experimental study on vibration behaviour of top floor in a double–floor system

K Yoshimura, K Kikuchi, M Kuroki, I Iida, K Okita and S Kudo*

Rheological properties of cement grout for prepacked concrete

J Zhang, S Swaddiwudhipong and S L Lee*

Study on fractal effect of concrete damage induced by corrosion of reinforced bars subjected to externally applied direct current

X J Zhou, B Gao and J G Guo*

Self–compacting concrete: modern concrete and admixture technology

R Beissel and H Lim

Predicting concrete strength using neural network approach

C S Abdullah, F Siraj and M D Abu Bakar*

The Influence of red tropical soil on the properties of brickwork mortar

C S Abdullah, N Narais and I Hasan*

Durability design for concrete

G Chadbourne

Self compacting concrete (SCC) – New technologies for precast industry

E Kleen

Shear strength behaviour of crushed stone reinforced concrete corbels

O Q Aziz

Additional Paper

25th Conference on Our World in Concrete & Structures

Technical Paper

Cyclic behaviour of masonry infilled R C frames with and without openings
S Abdel-Gawad Aly, M A N Abdel-Mooty, H H Shaheen and M E Issa
