

27<sup>th</sup> Conference on

**Our World in Concrete & Structures**

29 – 30 August 2002, Singapore

Volume XXI (2002) with ISBN reference

**Table of Contents**

Paper No. List of Papers/Authors

Conference 2002 Lecture

Rehabilitation of concrete sewer system using anti-bacterial admixture  
G M Sabnis\* and W E Shook

Keynote Papers

Recent outstanding structures in structural concrete engineered for the South Asian construction environment  
C R Alimchandani\*

Test methods for steel fibre reinforced concrete  
B I G Barr\*, B E Barrangán, D Dupont, E Erdem, R Gettu, M K Lee, J F Olesen, S Schaerlaekens, B Schnutgen, H Stang & L Vandewalle

Materials for sustainable infrastructure development – from resource productivity to resource generation  
D W S Ho\* and C T Tam

Testing the shock vibration resistance of concrete for setting vibration control limits against blasting damage  
A K H Kwan\* and P K K Lee

A spectacular collapse: the Koror-Babeldaob (Palau) balanced cantilever prestressed post-tensioned bridge  
B McDonald, V Saraf and B Ross\*,

Basic aspects of RC structures repair and strengthening  
F Mola\*

Stray electric current – a little known cause of steel reinforcement corrosion  
C Stanley\*

Japanese Standardization of recycling materials to concrete  
Y Tsuji\* and Y Suzuki

Technical Papers

Effect of concrete aggregate gradation and water-cement ratio on propagation of ultrasonic waves  
S A Abo-Qudais\*

Effect of fineness of cement on properties of fresh and hardened concrete  
S Ahmad\*

Shear behaviour of high–strength concrete beams without web reinforcement  
S Ahmad\*

Effect of curing on the properties of silica fume cement concrete  
O S B Al–Amoudi, S H Alidi\*, M Maslehuddin and M H Al–Mehthel

Chloride and sulphate concentration in concrete exposed to marine conditions  
H Al–Khaiat\* and M N Haque

On the behaviour of polymer portland cement concrete  
A M Alkhaleefi\*, M M El–Hawary and H Abdel–Fattah

Comparative study of three permeability tests  
O M Al–Otaibi and B I G Barr\*

Characterization of interface in high performance concrete – a fracture mechanics approach  
G Appa–Rao\*, B K Raghu–Prasad and R Malathy

The ultimate load carrying capacity of concrete members with headed bars  
P G Bakir\* and M H Boduroglu

Shear strength of R C flexural members under monotonic loading  
P G Bakir\* and M H Boduroglu

Predicting the shear strength of deep beams  
P G Bakir\* and M H Boduroglu

Strength and durability of concrete with crushed sand  
B Balapgol\*, S A Kulkarni and K M Bajoria

Predicting Creep performance of cellulose fibre reinforced concrete  
F Bullen\*

Influence on the anchorage configurations of lateral reinforcement on the seismic behaviour of reinforced concrete columns  
J J Castro\*, H Imai and K Arai

A new simplified approach to the analysis of torsional problems in eccentric systems: the ‘Alpha’ method from theory to practice  
C Ceccoli, T Trombetti, G Gasparini and S Silvestri\*

Efficiency of strengthening R C columns with different slenderness ratios using CFRP wraps  
E E Etman\*

Development of high–strength self compacting concrete with fly ash: a four step experimental methodology  
R Gettu\*, J Izquierdo, P C C Gomes and A Josa

Effect of alkaline–resistant glass fibre on compressive strength of light weight foamed concrete  
Hanizam Awang\* and N M Noordin

Study of attrition loss based on site test for space curve tightwire prestress of PC bridges  
S H He\*, X X Zhao and S Z Xu

Research of the capacity reduction factor for RC beam girder using dynamic assessment method  
S H He\*, Y F Song and W Quan

A possibility of utilization of municipal solid waste incineration ash wastes as concrete admixture additives  
W J Huang\*

Seismic behaviour of RC columns reinforced by super high–strength continuous hoops with double anchorage  
H Imai\*, J J Castro and N Kano

Ready–Mixed Concrete growth prospects in India  
A K Jain\*

Admixture for use of manufactured sand in concrete  
J B Jiang\*, S Loh and S Q Zhang

Effective reinforcement layout for skew slabs  
A Kabir\*, S M Nizamud–Doulah and M Kamruzzaman

The future of engineering structures during this fast changing climatic and human thought  
V S Kamara\* and X L Liu

Experimental study on seismic behaviour of RC Short wall girders in grouted masonry buildings  
K Kikuchi\*, K Yoshimura, A Tanaka and K Yoshida

Experience with new admixture technologies in high performance concrete  
D King\*

Ductility enhancement of non–seismically designed reinforced concrete columns  
J S Kuang\* and H F Wong

Effectiveness of shear reinforcement in slabs under punching loads  
R B Lan\*, S Teng and H K Cheong

Modelling of reinforced concrete beams strengthened by jacketing  
N MacAlevey\* and H K Cheong

Experimental behaviour of reinforced concrete beams strengthened in flexure and shear using carbon fibre  
N MacAlevey\* and B Zhang

Development of mix proportioning procedure for flyash concrete  
S C Maiti\*, R C Wason, H K Julka and A Maidasani

Drying shrinkage of cementitious composites incorporated with silica fume  
R Malathy and G Appa Rao\*

Setting times and autogenous shrinkage before demoulding of high strength concrete  
M Mazloom\* and A A Ramezaniapur

Drift minimization of tall building frames  
Md Kamruzzaman\*, Md M Sazzad+ and T Ahmed

Study of behaviour of reinforced concrete deep beam under two points loading and the effect of shear reinforcement

Md M Sazzad\*, M M Younus Ali, and S M Nizamud–Doulah

Analysis and design of an office building with mono column

E K Mohanraj\*, S Nisar Ahmad and A Gowri Sankar

The investigation of beam to beam connection of precast concrete element under monotonic and cyclic loading

D R Munaf\*, D Suraatmadja and N Suhana

Strengthening of reinforced concrete beam using external prestressing

K L Muthuramu\*, G Jeyakumar+, N Sadish–Kumar and M S Palanichamy

Repairs and rehabilitation of Kaigaon–Toka bridge on Godavari River at Aurangabad–India

V Naik\*

Deterioration process of reinforced–concrete pipe columns

P Nibasumba\* and X L Liu

Failure process of rectangular reinforced concrete columns

P Nibasumba\* and X L Liu

Behaviour of RC skew slabs – finite element model and validation

S M Nizamud–Doulah, A Kabir and Md Kamruzzaman\*

Prefabrication techniques for residential building

M S Palanichamy+, K L Muthuramu\* and G Jeyakumar

Design guidelines for the use of fibre reinforced shotcrete in ground support

F Papworth\*

Production and application of silica fume

F Papworth\* and G Hastie

Effect of fibre on expansion due to alkali–silica reaction in mortar containing waste glass aggregates

S B Park\* and B C Lee

Effect of mixing, curing and testing temperatures in compressive and tensile strength of fibre reinforced concrete

A Qudah\*, R H Haddad and E A Jafar

RCC roofing elements with Flex ‘O’ Board lost forms

N Raghavendra, B L P Swami\* and S Kumar

Strains in longitudinal steel at support regions of beams

K N Rahal\*

Cost effectiveness of silica fume concrete design mixes

P Rattish–Kumar\* and C B K Rao

Effect of superplasticizer on the rheological properties of coir fibre reinforced cement mortar

G Ramakrishna and T Sundararajan\*

Combined foundation system for supporting reflectors and DUT positioner  
V R Rengasamy, C Thiagarajan and M Chandrashekar\*

Chloride-ion diffusivity and microstructure of construction joint  
R Sakurada\*, K Maruyama, J Z Yu and Y Kawazoe

Statistical evaluation of rapid chloride tests for concrete containing various cement replacement materials  
M K Sam\*

Rheological model for self-compacting concrete – paste rheology  
A M M Sheinn\*, D W S Ho and C T Tam

Efficiency of plasticizers, a practical approach to assess the performance  
M S Shetty\*

Test method for evaluating fatigue resistance of crack repaired zone in concrete and mortar by injecting epoxy resin  
H C Shin\* and K Tanaka

Demolition waste and its reuse  
A N Sinha\*

A chloride binding capacity model for cement-fly ash paste  
T Sumranwanich and S Tangtermisirikul\*

Development of insitu SIFCON for connections in precast concrete and seismic resistant structures  
L Svermova\* and P J M Bartos

Experimental study on 'non-anchor' reinforced concrete shear wall for seismic retrofit  
S Takatani\*, M Maruta, T Kanda and K Yanagita

Shear studs in slab-column connections with rectangular column  
C B Tan\*, S C Lee and S Teng

Review of the load and resistance factor (LRF) for the Indonesian concrete code  
H R Tanuwidjaja\* and G K Santoso

Estimation of tensile strength of early aged mass concrete using uniaxial tensile test method  
G Tanzil\*

Accelerated heating of precast ferrocement secondary roofing slabs using microwave energy  
C P Teo\*, K C G Ong, C H Shum and S T Tan

Structural Lightweight concrete from fly ash aggregates  
A K Tiwari\* and P Bandyopadhyay

An experimental study of interior slab-column connections with non-uniform slab thickness under vertical loads  
S D Ye\* and S Teng

The effect of a new carboxylic acid-based superplasticizer on the flow properties of cement pastes  
Y S Ye and K C Hsu\*

Study on strength and durability of concrete using low quality coarse aggregate from circum-pacific region

W Yodsudjai\*, N Otsuki, T Nishida, R Onitsuka

Experimental study on effects of presence of non-structural wall with ALC slits on seismic behaviour of RC columns

K Yoshimura\*, K Kikuchi, M Kuroki, K Yokogi, R Shimizu, Y Matsumoto, J Katanami and J H Wang

Seismic performance of interlock concrete block masonry walls

K Yoshimura\*, K Kikuchi, M Kuroki, H Nonaka, M Ushijima, K T Kim, T Itai and Y Matsumoto

Seismic strengthening for rectangular RC columns confined by circular steel- and carbon fibre-jackets

K Yoshimura\*, K Kikuchi, M Kuroki and J H Wang

Determination of water-to-cement ratio by optical microscopy for concrete used in tropical environment

S Q Zhang\* and M H Zhang
