

# International Conference on PROBLEMATIC SOILS

29 – 30 July 2003 – Nottingham, United Kingdom

## TABLE OF CONTENTS

### **Keynote Papers**

Fills: their engineering character and treatment  
*F G Bell and M G Culshaw\**

Geotechnical properties of problem soils formed outside the temperate regions  
*F G Bell and M G Culshaw\**

Building on fill: the significance of collapse compression  
*J A Charles\**

Post-wetting static and dynamic behaviour of collapsible soils  
*S L Houston\*, T Elkady and W N Houston*

Shrinkable soils in the United Kingdom an ongoing National disaster  
*C Page\**

Use of geosynthetics in embankments on soft soils  
*M I M Pinto\* and P J da Venda Oliveira*

Shear strength characteristics of residual soils in Singapore  
*H Rahardjo\*, E C Leong and R B Rezaur*

Mineral and chemical analyses of weathered and unweathered Pierre Shale  
*V R Schaefer\* and R A Lohnes*

On the shear strength of unsaturated soils  
*D Toll\**

### **Technical Papers**

Earth dams on liquefiable soil deposits: State-of-the-art in seismic rehabilitation  
*K Adalier\* and M K Sharp*

Physico-chemical picture and interpretation of swell potential of expansive soils and method of stabilisation  
*W Abdullah*

Effect of fibres on unconfined compressive strength of clayey soil  
*N M Al-Akhras\**

Geopier® intermediate foundation systems – case studies for building foundations over soft organic soils and peat  
*C Allgood, L Weppeler+, B Lien\* and N S Fox*

Improvement of soil geotechnical properties using incinerator ash  
*A A Al-Rawas\*, H Hassan, K Al-Shihi, K Al-Hashmi & Y Al-Alawi*

Effect of vibro-stone columns on the interpretation of seismic cone data  
*A Amini and J A Howie\**

Engineering behaviour of cement-acrylic resin treated soft clay  
*C A Anagnostopoulos, I Stavridakis\* and I N Grammatikopoulos*

Investigation of Loess composition and properties for radioactive waste disposal  
*D Antonov\**

Small strain shear modulus of volcanic soils and evaluation methods  
*T Asonuma\*, S Miura and A Timpong*

Geotextile filtration of a problematic silt in a triaxial permeameter  
*Azlan A Aziz\*, H Omar and Md Z Yusoff*

Study on the Liquefaction characteristic of QianTang River silts  
*Y Q Cai\* and X D Pan*

A study on the behaviour of adjacent ground applying compaction grouting method in soft clay  
*B S Chun\* and Y H Yeoh*

Compilation of an SPT–LPT grain size effect database for gravels  
*C R Daniel\*, J A Howie and A Sy*

Specific surface area: an aid to identify some problem soils  
*D Entwisle\* and S Kemp*

Comparison of the experimental behaviour of unsaturated silty soil with Barcelona Model  
*A R Estabragh\*, A A Javadi and J C Boot*

A study of loess area geodynamic development for NPP construction  
*J Evlogiev\**

Comparison of liquefaction assessment of Adapazari Region after the August 17th 1999 Marmara Earthquake  
*S Firat\* and H Arman*

An investigation into Atterberg Limits and their suitability for assessing the shrinkage and swelling characteristics of clay soils for foundation design  
*C A Gray\* and M W Frost*

Permeability and adsorption properties of the compacted volcanic cohesive soils  
*Y Hayashi\*, Y Kitazono and A Suzuki*

Determination of swelling in Marl Eluvia and Illite clays  
*J Jaremski\**

Some results of bioremediation in waste yards and their influence on the contaminated soils  
*J Jaremski\**

Foundation improvement for preventing seepage using cutoff walls  
*S Jaritngam\**

Volume change and hydraulic conductivity properties of an expansive clay exposed to landfill leachate  
*S Jayasekera\**

Solution to improve soils in Northern–East of Iran mixed with Gypsum  
*M R Kakhi\**

Characteristics of long–term settlement on highly organic soil  
*S Kamao\*, T Wakisaka and T Saito*

Arching in the calcareous soil of Tabriz  
*H Katebi, R Freer–Hewish and G Ghataora\**

Effect of suction on unconfined compressive strength of decomposed granite soil  
*S Kato\*, Y Yoshimura, W Sunden and H Shinkai*

Properties of lateral swelling at clayey soils  
*S N Keskin\* and S Uzundurukan*

A constitutive model for unsaturated weak rockfills

*Y Kohgo\*, I Asano and Y Hayashida*

The effect of Thornthwaite moisture index changes on ground movements in expansive soils in Victoria, Australia

*K McManus\*, D Lopes and N V Osman*

Light buildings on swelling / shrinking soils: Case histories from Oltrepo Pavese (North–Western Italy)

*C Meisina\**

Feasibility of using shredded tyres as a drainage material in geotechnical applications

*C C Miller\* and M W Frost*

A study on the impacts of wastewater on the coastal soils of the Red Sea near Jeddah

*A M Mohorjy\* and A M Khan*

Practical determination of soil permeability of sand sediment that includes gravel and cobbles

*T Morii\*, Y Takeshita and M Inoue*

Cyclic shear behaviour of cemented marine clay subjected to initial shear stress

*S Narasimha Rao\*, G G Moses and A Swarnalatha*

Root reinforcement of unstable slopes in Northern Greece and Central Italy

*J E Norris\* and J R Greenwood*

Tertiary compression of fibrous peat

*C D O'Loughlin\* and B M Lehane*

Swelling pressure of clays and its control

*M L Ohri\**

Identification, effect and consolidation of constructions grounded on shrinking clays

*A Popa\*, V FC Urian and A Suci*

Volumetric swell and shrinkage movements of stabilized expansive soils

*A J Puppala\* and K Punthutaecha*

Problems and solutions in run–way formation on high compressible soft clay

*R Rama Rao\**

Voltage and duration effects on electro–osmotic treatment of dispersive soils

*J Sadrekarimi\* and A Sadrekarimi*

A Numerical model for seepage behaviour of unsaturated soil

*K Sako\* and R Kitamura*

Vapour equilibrium technique for tests on a highly compacted bentonite–sand mixture

*A S Samingan\* and T Schanz*

The use of peat as filling material

*A Sato\* and J Nishikawa*

Dry bottom feed vibro stone column construction techniques in soft clay soils and contaminated fills

*C J Serridge\* and M Evans*

A Case study – Stabilisation of the dispersive soil by the application of admixture

*S S Shah\* and M S Ahmad*

Effect of acid rain on the index and strength properties of swelling soils

*V K Stalin\*, G Annalaxmi and K Pachaiyappan*

Influence of acid permeation on the chemical characteristics of soils and solid waste

*V K Stalin\*, P Dayakar and M Muthukumar*

Treatment of granular fills and collapsible loess deposits using the rapid Impact compaction technique  
*O Synac, C J Serridge\* and M Evans*

Effect of heat treatment on the behaviour of Montmorillonite clay in presence of lime  
*M A Taher\**

Pile foundation bearing capacity characteristics of volcanic ash in Hokkaido, Japan  
*K Tomisawa\* and J Nishikawa*

Being Creative – Practical solutions for (Theoretical) problematic soils  
*J Vlak\**

Analysis of consolidation creep of marine soft soils  
*C M Wang, Q Wang, S H Zhang and Y B Xia*

A quantitative study on the micro–structure characteristics of soil and its application in engineering  
*Q Wang\*, J P Chen and B F Shi*

Cation exchange capacity and swelling characteristics of geosynthetic liners  
*D C Wijeyesekera*

Study, analysis and stabilization of the slope of Km 2 of Northern Freeway of Tabriz  
*M Yousezadeh Fard\* and R Vafali Pour*

Laboratory test study of soda residual soil  
*M Y Zhang\* and F Q Han*

The effect of expansive soils in Sufi–Chai project  
*R Ajalloeian and M R Ashkbosi*

Load tests in model piers and dimensional analysis  
*D V Borges\* and A P Garcia*

Sustainability land use planning of Siva Oasis, western desert of Egypt using remote sensing and GIS techniques  
*A H ElNahry*

Stabilization of black cotton soil with lime  
*A L Kyulule\**

Highly soil suction portion of the soil–water characteristic curve  
*T Nishimura\**

Reclamation of expansive soil by adding coarser fractions and their predictions  
*V K Stalin\*, A P Ambily and K Pachaiyappan*

Company profile – co–sponsors
