

CONFERENCE LECTURE

5th Asia–Pacific Conference on

SHOCK & IMPACT LOADS ON STRUCTURES

November 12 – 14, 2003 : Changsha, Hunan, China

With ISBN reference

TABLE OF CONTENTS

Foreword

Messages

Preface

Advisors & Committee

Table of Contents

Curriculum vitae of Professor N. Ishikawa

CONFERENCE LECTURE

A trial on protective technology and environmental problem – impact resistance of hybrid rubber materials and collection of bullets

N. Ishikawa* and N. Ikoma

KEYNOTE PAPERS

Protection technologies for improving blast resistance of buildings

J.E. Crawford* and S.R. Lan

Effects of simultaneous ground shock and airblast force on structural responses

H. Hao* and C.Q. Wu

Several problems on demolishing third phase RCC cofferdam of three gorges dam projects by blasting

S.H. Li* and Z.N. Tian

CONFERENCE LECTURE

On foam impact induced damage waves in reinforced carbon–carbon

J. Lu*, Y. W. Mai, Ph. Vanspeybroeck, X. Zhang and J. Gu

Hard impact testing in characterising new materials

S.H. Perry, R.P. West* and B. Bromwich

Numerical simulation of structural deformation under shock and impact loads using a coupled multi–solver approach

X. Quan*, N.K. Birnbaum, M.S. Cowler, B.I. Gerber, R.A. Clegg and C.J. Hayhurst

Testing to evaluate the containment of major impact damage in underground mine workings

T.R. Stacey*, W.D. Ortlepp and L. Human

TECHNICAL PAPERS

Response of clamped orthotropic plate subjected to the dynamic moving load

S.W. Alisjahbana

Scaling of impact loaded plain concrete beams

V. Bindiganavile* and N. Banthia

Searching of potential sliding surface of slope considering earthquake

P. Cao* and F. Chen

Influences of loading pulse width and loading area size on wave propagation in rods

H.Y. Chai*, M.G. Liu and Y.K. Wai

Study of plan irregularity effects on seismic vulnerability of moment resisting framed structures

S. Chandrasekaran*, U.K. Tripathi and M. Srivastava

Study on action of the seismic waves on tunnel structure along axial orientation

Q.N. Chen* and Y.X. Zhang

Impact response of a rollover protective structure for a Komatsu 630E dump truck

B.J. Clark*, D.P. Thambiratnam, N.J. Perera and N. Baker

Impact on a RC rock–shed slab : percussion analysis

CONFERENCE LECTURE

F. Delhomme, P. Perrotin*, M. Mommessin and J.-P Mougín

Train's crashworthy design and collision analysis

G.J. Gao and H.Q. Tian*

Experimental researches and computer simulations on dynamic responses of free-free tubes impacted laterally

J.G. Guo, L.J. Zhou, G.Y. Lu* and S.Y. Zhang

The generalised kinetic energy theorem of continuum mechanics

S.H. Guo*

Collapse of square metal tubes in splitting and curling mode

X. Huang, G. Lu* and T.X. Yu

A model for damage failure process of laminated composites under low velocity impact

D.Z. Jiang, D W. Shu* and W. Shen

Numerical investigation on characteristics of shock wave frequency in jointed rock masses

Y.Y. Jiao* and J. Zhao

Seismic response of twin circular tunnels

F. Khoshnoudian*

Evaluation of the blast-resistance of metal deck roofs

S.R. Lan* and J.E. Crawford

Numerical model of the damping-solvent extraction method in the time domain and application to the solution of wave scattering problems

J.B Li*, J.Y. Chen and G. Lin

A fracture damage model of multi-set jointed rock mass and its application

J T. Li* and P. Cao

Dynamic response of finite-size crack under impulse loading

X.B. Li, L Q. Hu* and T.S. Lok

The laws of energy distribution for blasting vibration signals based on wavelet package decomposition

X.B. Li, T.H. Ling* and T.S. Lok

CONFERENCE LECTURE

Controlled blasting of commercial complex

B.K. Lim*, J. Wang and Y.C. Gu

Numerical analysis on vehicle collision to flexible precast concrete guard fence

B. Liu and Y. Itoh

The study on dynamic response in the structural of variable stiffness for quakeproof and absorb shock

X.J. Liu*

Dynamic stress–strain response of granite from split Hopkinson Pressure Bar tests

T.S. Lok*, P.J. Zhao, X.B. Li and C.H. Lim

Experimental investigation on the dynamic response and failure of three–span continuous pipe–beam

G.Y. Lu*, J.P. Lei and S.Y. Zhang

One dimensional analysis of shock wave transmission in layered foam materials

G.W. Ma*, C.K. Soh and X.M. An

Preliminary design and numerical analyses of steel blast doors and windows

C.E. Majorana and V.A. Salomoni*

Fundamental considerations on the effects of shock absorbers attached to the end of bridge girders

T. Moriyama* and T. Yoda

Analysis of aircraft impact on containment structure

G. Prabhakar*, R. Ranjan, Mini K. Paul and U.S.P. Verma

Earthquake and blast shock loading on masonry veneer structures

F. Rangelova*

Analysis of blast effects on buildings and structural components

A.M. Remennikov*

Experiments and numerical analysis of RC bridge pier models under cyclic bi–axial horizontal loadings subjected to earthquake motions

CONFERENCE LECTURE

T. Sato*, H. Kobayashi and U. Shimada

Simultaneous identification of damping factor and stiffness on beams under impact loading

T. Shibata*, T. Mikami and A. Sutoh

Impact Load Theory – a new pile driving and testing method for the new millennium on piles

Y.K. Wai* and Md Nuri Salimin

Train-induced cyclic load in an elastic half-space

C.J. Wang*, Y.M. Chen and S.Y. Wen

Wavelet analysis for measuring signals of the dynamic pressure of soil in the road foundation under vibration loads of high-speed train

X.Q. Wang*, L.D. Yang and W.H. Gao

Stability analysis of the complicated rock slope under considering the stochastic seismic function

W. Wan*

Numerical simulation of simultaneous ground shock and airblast pressure on nearby structures from surface detonation

C. Wu and H. Hao*

Theory and application of Rayleigh Wave in arch-dam structure

T.D. Xia*, G.Q. Liang, K.Z. Yan and D.K. Gong

Dispersion characteristics of SH waves in two-layered plate

T.D. Xia*, K.Z. Yan and G.F. Xing

Experimental investigation on the effect of bubble energy loading in rock blasting

G.Y. Xu*, D.S. Gu, R.D. Huang and D.W. Liu

Research on impacting characteristic of thin-walled structures and the application in vehicle crashworthiness

S. Yao and H.Q. Tian*

Computer aided design for rockburst hazard prevention at Hemlo Mines of Canada

X.P. Yi*

Experimental study on dynamic mechanical properties of Al_2O_3 ceramics and the establishment

CONFERENCE LECTURE

of a dynamic constitutive equation

X.Q. Zhang*, J.G. Ning, X.H. Yao, L.M. Zhao and G.T. Yang

Application and study of the method of longhole deck blasting and joint-cutting cartridge blasting with water coupled medium in large-diameter blastholes

Y.P. Zhang*, X.B. Li, Y.J. Zuo and W.H. Wang

Experimental research on cutting and impacting the hard rock

F.J. Zhao*, X.B. Li and L.Q. Hu

Designing the crashworthy leading unit of city rail transit train

H.L. Zhao*, W.B. Wang and Y.F. Liao

Simplified spall-resistance design for combined rock bolts and steel fibre reinforced shotcrete support system subject to shock load

P.J. Zhao*, T.S. Lok, J. Zhao and G.C. Yang

Effects of multiple parallel fractures with linear deformational behaviour on small-amplitude one-dimensional P-wave attenuation

X.B. Zhao*, J. Zhao and J.G. Cai

Analysis and design of explosion containment vessels

J.Y. Zheng, Y.L. Hu, G.H. Zhu, Q.M. Li* and S.R. Reid

Calculation for strong airblast reflection factor

F.J. Zhou*, X.J. Li and Y. Zheng

Study on dynamic response of continuous beam and seismic assessment

Y.J. Zhou*, S.H. He, Y.F. Song and X.X. Zhao

CONFERENCE LECTURE

A trial on protective technology and environmental problem – impact resistance of hybrid rubber materials and collection of bullets

N. Ishikawa, National Defense Academy, Japan

N. Ikoma, Shibata Industrial Co. Ltd., Japan

KEYNOTE PAPERS

Protective technologies for improving blast resistance of buildings

J. E. Crawford, Karagozian & Case, USA

S. R. Lan, Karagozian & Case, USA

Effects of simultaneous ground shock and airblast force on structural responses

H. Hao, The University of Western Australia, Australia

C. Q. Wu, The University of Western Australia, Australia

Several problems on demolishing third phase RCC cofferdam of three gorges dam projects by

CONFERENCE LECTURE

blasting

S. H. Li, Chinese Academy of Sciences, China

Z. N. Tian, Chinese Academy of Sciences, China

On foam impact induced damage waves in reinforced carbon–carbon

Jin Lu, 3L Laboratory, Canada

Y. W. Mai, The University of Sydney, Australia

Ph. Vanspeybroeck, University of Ghent, Belgium

X. Zhang, CSIRO Petroleum, Australia

J. Gu, Carleton University, Canada

Hard impact testing in characterising new materials

S.H. Perry, Trinity College, University of Dublin, Ireland

R. P. West, Trinity College, University of Dublin, Ireland

B. Bromwich, Trinity College, University of Dublin, Ireland

Numerical simulation of structural deformation under shock and impact loads using a coupled multi–solver approach

X. Quan, Century Dynamics, Inc., USA

N. K. Birnbaum, Century Dynamics, Inc., USA

M. S. Cowler, Century Dynamics, Inc., USA

B. I. Gerber, Century Dynamics, Inc., USA

R. A. Clegg, Century Dynamics, Ltd, England

C. J. Hayhurst, Century Dynamics, Ltd, England

Testing to evaluate the containment of major impact damage in underground mine workings

T. R. Stacey, University of the Witwatersrand, South Africa

W. D. Ortlepp, SRK Consulting, South Africa

L. Human, SRK Consulting, South Africa

SPECIAL SESSION PAPERS

One dimension analysis of shock wave transition in layered foam materials

G. W. Ma, Nanyang Technological University, Singapore

CONFERENCE LECTURE

C. K. Soh, Nanyang Technological University, Singapore

X. M. An, Nanyang Technological University, Singapore

'Experimental investigation on the effect of bubble energy loading in rock blasting'

G Y Xu*, D S Gu, R D Huang and D W Liu

Central South University, China

TECHNICAL PAPERS

Response of clamped orthotropic plate subjected to the dynamic moving load

S. W. Alisjahbana, Tarumanagara University, Indonesia

Scaling of impact loaded plain concrete beams

V Bindiganavile and N Banthia, University of British Columbia, Canada

Searching of potential sliding surface of slope considering earthquake

P. Cao, Central South University, China

F. Chen, Central South University, China

Influences of loading pulse width and loading area size on wave propagation in rods

H. Y. Chai, Institute of Rock and Soil Mechanics, China

M. G. Liu, Institute of Rock and Soil Mechanics, China

Y. K. Wai, Traswaja Group, Malaysia

Study of plan irregularity effects on seismic vulnerability of moment resisting framed structures

S. Chandrasekaran, Banaras Hindu University, India

Study on action of the seismic waves on tunnel structure along axial orientation

Q. N. Chen, Hunan Science and Technology University, China

Y. X. Zhang, Chongqing University, China

Impact response of a rollover protective structure for a Komatsu 630E dump truck

B J Clark*, Queensland University of Technology, Australia

D.P. Thambiratnam, N.J. Perera and N. Baker

Impact on a RC rock-shed slab : percussion analysis

CONFERENCE LECTURE

F Delhomme, P Perrotin*, M. Mommessin and J.-P Mougin, University of Savoy, France

Train's crashworthy design and collision analysis

G.J. Gao, Central South University, China

H.Q. Tian*, Central South University, China

Experimental researches and computer simulations on dynamic responses of free-free tubes impacted laterally

J. G. Guo, TaiYuan University of Technology, China

L. J. Zhou, TaiYuan University of Technology, China

G. Y. Lu, TaiYuan University of Technology, China

S. Y. Zhang, TaiYuan University of Technology, China

The generalised kinetic energy theorem of continuum mechanics

S. H. Guo, Central South University, China

Collapse of square metal tubes in splitting and curling mode

X. Huang, Swinburne University of Technology, Australia

G. Lu, Swinburne University of Technology, Australia

T. X. Yu, Hong Kong University of Science and Technology, Hong Kong

'A model for damage failure process of laminated composites under low velocity impact'

D. Z. Jiang, D. W. Shu* and W. Shen

Numerical investigation on characteristics of shock wave frequencies in jointed rock masses

Y. Y. Jiao, Nanyang Technological University, Singapore

J. Zhao, The Chinese Academy of Sciences, China

Seismic response of twin circular tunnels

F. Khoshnoudian, Lar Consulting Engineers, Iran

Evaluation of the blast-resistance of metal deck roofs

S. R. Lan, Karagozian & Case, USA

J. E. Crawford Karagozian & Case, USA

Numerical model of the damping-solvent extraction method in the time domain and application to the solution of wave scattering problems

J. B Li, Dalian University of Technology, China

CONFERENCE LECTURE

J. Y. Chen, Dalian University of Technology, China

G. Lin, Dalian University of Technology, China

A fracture damage model of multi-set jointed rock mass and its application

J. T. Li, Central South University, China

P. Cao, Central South University, China

Dynamic response of finite-size crack under impulse loading

X. B. Li, Central South University, China

L. Q. Hu, Central South University, China

T. S. Lok, Nanyang Technological University, Singapore

The laws of energy distribution for blasting vibration signals based on wavelet package decomposition

X. B. Li, Central South University, China

T. H. Ling, Central South University, China

T. S. Lok, Nanyang Technological University, Singapore

controlled blasting of commercial complex

B.K. Lim*, Fyfe Asia Pte Ltd, Singapore

J. Wang, Unitech Engineering Pte Ltd, China

Y.C. Gu, Sichuan Railway Research Institute, China

Numerical analysis on vehicle collision to flexible precast concrete guard fence

B. Liu, Nagoya University, Japan

Y. Itoh, Nagoya University, Japan

The study on dynamic response in the structural of variable stiffness for quakeproof and absorb shock

X. J. Liu, Hunan University of Science & Technology, China

Dynamic stress-strain response of granite from split Hopkinson Pressure Bar tests

T. S. Lok, Nanyang Technological University, Singapore

CONFERENCE LECTURE

P. J. Zhao, National University of Singapore, Singapore

X. B. Li, Central South University, China

C. H. Lim, Defence Science and Technology Agency, Singapore

Experimental investigation on the dynamic response and failure of three-span continuous pipe-beam

G. Y. Lu, TaiYuan University of Technology, China

J. P. Lei, TaiYuan University of Technology, China

S. Y. Zhang, TaiYuan University of Technology, China

Preliminary design and numerical analyses of steel blast doors and windows

C. E. Majorana, University of Padua, Italy

V. A. Salomoni, University College Dublin, Ireland

Fundamental considerations on the effects of shock absorbers attached to the end of bridge girders

T. Moriyama, Anan College of Technology, Japan

T. Yoda, Waseda University, Japan

Analysis of aircraft impact on containment structure

G. Prabhakar*, R. Ranjan, Mini K. Paul and U.S.P. Verma

Earthquake and blast shock loading on masonry veneer structures

F. Rangelova, University of Architecture, Civil Engineering & Geodesy, Bulgaria

Analysis of blast effects on buildings and structural components

A.M. Remennikov*, University of Wollongong, Australia

Experiments and numerical analysis of RC bridge pier models under cyclic bi-axial horizontal loadings subjected to earthquake motions

T. Sato, Osaka City University, Japan

H. Kobayashi, Osaka City University, Japan

U. Shimada, Toyo Giken Consulting Co. Ltd., Japan

Simultaneous identification of damping factor and stiffness on beams under impact loading

T. Shibata, Matsue National College of Technology, Japan

T. Mikami, Hokkaido University, Japan

CONFERENCE LECTURE

A. Sutoh, Chizaki Kogyo Co., Japan

Impact Load Theory – a new pile driving and testing method for the new millennium on piles

Y. K. Wai, Traswaja Group, Malaysia

Md Nuri Salimin Traswaja Group, Malaysia

Train-induced cyclic load in an elastic half-space

C. J. Wang, Zhejiang University, China

Y. M. Chen, Zhejiang University, China

S. Y. Wen, East China Jiaotong University, China

Wavelet analysis for measuring signals of the dynamic pressure of soil in the road foundation under vibration loads of high-speed train

X. Q. Wang, Hunan University of Science & Technology, China

L. D. Yang, Tongji University, China

W. H. Gao, Hunan University of Science & Technology, China

Stability analysis of the complicated rock slope under considering the stochastic seismic function

W. Wan, Hunan University of Science & Technology, China

P. Cao, Central South University, China

Numerical simulation of simultaneous ground shock and airblast pressure on nearby structures from surface detonation

C. Wu, The University of Western Australia, Australia

H. Hao, The University of Western Australia, Australia

Theory and application of Rayleigh Wave in arch-dam structure

T. D. Xia, Zhejiang University, China

G. Q. Liang, Zhejiang Institute of Hydraulics and Estuary, China

K. Z. Yan, Zhejiang University, China

D. K. Gong, Zhejiang University, China

Dispersion characteristics of SH waves in two-layered plate

T. D. Xia, Zhejiang University, China

K. Z. Yan, Zhejiang University, China

CONFERENCE LECTURE

D. K. Gong, Zhejiang University, China

Research on impacting characteristic of thin-walled structures and the application in vehicle crashworthiness

S. Yao, Central South University, China

H.Q. Tian*, Central South University, China

Computer aided design for rockburst hazard prevention at Hemlo Mines of Canada

X. P. Yi, Central South University, Changsha, China

Experimental study on dynamic mechanical properties of Al_2O_3 ceramics and the establishment of a dynamic constitutive equation

X. Q. Zhang, Taiyuan University of Technology, China

J. G. Ning, Beijing Institute of Technology, China

X. H. Yao, Taiyuan University of Technology, China

L. M. Zhao, Taiyuan University of Technology, China

G. T. Tang, Taiyuan University of Technology, China

Application and study of the method of longhole deck blasting and joint-cutting cartridge blasting with water coupled medium in large-diameter blastholes

Y. P. Zhang, Central South University, China

X. B. Li, Central South University, China

Y. J. Zuo, Central South University, China

W. H. Wang, Central South University, China

Experimental research on cutting and impacting the hard rock

F. J. Zhao, Hunan University of Science & Technology, China

X. B. Li, Central South University, China

L. Q. Hu, Central South University, China

Designing the crashworthy leading unit of city rail transit train

H. L. Zhao, Tongji University, China

W. B. Wang, Tongji University, China

Y. F. Liao, Tongji University, China

Simplified spall-resistance design for combined rock bolts and steel fibre reinforced shotcrete

CONFERENCE LECTURE

support system subject to shock load

P. J. Zhao, National University of Singapore, Singapore

T. S. Lok, Nanyang Technological University, Singapore

J. Zhao, Nanyang Technological University, Singapore

G. C. Yang, Nanyang Technological University, Singapore

Effects of multiple fractures with linear deformational behaviour on one-dimensional P-wave propagation

X. B. Zhao, Nanyang Technological University, Singapore
