

IMPLIED CONSENT, AGREEMENT AND UNDERSTANDING OF ALL
DISCLAIMERS (SEE BELOW) IS REQUIRED AND ASSUMED.

CAUTION: You must not use "Flasher 1.51" if you or a family member has ever suffered from epilepsy or other neurological problems. Use at your own risk. Statements made about these products have not been evaluated by the Food and Drug Administration. It is not intended to diagnose, treat, cure or prevent any disease. Site is for informational purposes only. Follow link at bottom, for complete list of all disclaimers.

Download your FREE "Virtual Light & Sound Machine" Install Software and Meditation Enhancer Ebook at:
www.SimplifiedHealth.com

Installation Instructions:

1. Run install.exe (Requires Windows 2000 or greater)

**2. When the DOSBox install dialog comes up,
change the destination to **c:\dosbox****

- Close all Windows programs and double-click the DOSBox icon from your desktop
- Disregard the software's initial startup tones
- For relaxation (similar to a hypnotic state), enter these three settings:
4 (flashrate) -- Y (color) -- A (pattern)
- Watch the screen for a few moments and then **CLOSE YOUR EYES**. Experience the relaxing effects of "Flasher 1.51", sensed through your closed eyelids, for at least five minutes.
- For best effect, dim room lights and ensure that you have privacy and quiet.
Try using, with or without relaxing music or a hypnotic audio program. Professional hypnosis MP3 audio downloads can be instantly and affordably downloaded from www.HypnosisDownloads.com/?1427

3. Press F8 and type "exit" to finish.

If computer's desktop icons do not automatically re-size, after exiting "Flasher," simply re-start computer and follow the balloon prompts to automatically restore your icon settings.

**If desired, you can easily delete DOSBox by double-clicking your C-drive, from "My Computer."
Find and delete the entire "DOSBox folder.**

**You may freely distribute my install software, as long as it is distributed without charge and not altered.
Questions can be emailed to: Jerry@SimplifiedHealth.com**

Templehof Publishers' Flasher 1.51 helps users experience deep states of relaxation, based upon the phenomenon associated with audio-visual stimulation. Since Flasher 1.51 is a 1990 DOS-based program, it is not compatible with Microsoft Windows operating systems. This original freeware program hosts copies of DOSBox and Flasher 1.51. It is designed to simplify the installation process for DOSBox and Flasher 1.51 in order for it to work on Microsoft Windows 2000 or later. DOSBox is open source software copyrighted by Free Software Foundation, Inc. Flasher 1.51 is shareware that is distributed by Templehof Publishing. Registration for non-commercial use costs \$10 and is payable to: Templehof Publishing; 2619 Market Garden; Austin, TX 78745. SimplifiedHealth.com is not affiliated with Templehof Publishing or Free Software Foundation, Inc.

You must not use "Flasher 1.51" if you or a family member has ever suffered from epilepsy or other neurological problems. Use at your own risk. Although most people enjoy positive results within their first few minutes of being exposed to the effects of a Light & Sound Machine, some people may not experience the positive effects, or may need to try the program several times, in order to achieve desired effect. One should immediately discontinue use, if one experiences any discomfort. Statements made about these products have not been evaluated by the Food and Drug Administration. It is not intended to diagnose, treat, cure or prevent any disease. Herein is for informational purposes only. **Complete disclaimers**, instructions and FREE audio hypnosis downloads can be found at www.Simplifiedhealth.com/hypnosisaudio.htm

BrotherSoft.com gave my "Virtual Light and Sound Machine Install" software a "...maximum 5 out of 5 Rating because this product is easy to use, it has a professional-looking interface, it is excellent compared to other programs..."
