## 5 Subject Grade Record for 1 Semester

This form is designed for use for 1 semester of grading. It can be used for quick recording of grades throughout the semester, or as a calculating form at the end of the semester. Simply write in the grades in the appropriate subject column, then write the average of grades for that subject on the line under the word Average.

The first page of this document is for the basic subjects taught in most Christian homeschools. For homeschools that do not teach Bible as a subject use page two, which has blank lines for the subject headings so you can customize your own forms by writing in the subjects you need. Page two could also be used for additional subjects not included on page 1 such as Art, Music, Home Economics, etc. I hope you find these forms useful in your homeschool record keeping.

Blessings!
