**PART B
ENGLISH**

SECTION A

COMPREHENSION

Read the passages below carefully and answer the questions that follow by choosing the most appropriate of the options lettered A – E (Nos. 1-10).

PASSAGE 1

Long time ago, babies began to talk immediately they were born. They could tell their mothers when they were sick, thirsty or hungry and needed some food.

One day, a woman left her newborn baby in the room and rushed to fetch water from a nearby stream. A woman, newly married, entered the room to fetch fire for her evening meal. Unknown to her that the baby was watching, she quickly took some of the meat that was kept across the hearth. When the mother of the baby returned, he disclosed to her that the woman had taken some of the meat.

The matter was taken to the king and the baby narrated how the woman hid the meat under her cloth before leaving the room. The new wife and her husband bowed their heads in shame. The king himself was embarrassed by the incident.

News of the incident spread all over the kingdom and people mocked the woman anytime they saw her passing. 'This cannot be allowed to continue', cried the king. 'Babies must be stopped from embarrassing adults with their talks.'

He ordered that a lump of flesh be forced down the throats of newborn babies to prevent them from talking until they are old enough to differentiate between right and wrong.

- | | |
|----------------------------------------|-------------------------------------|
| 1. According to the passage, babies | 2. The new wife entered the room to |
| A. cried for their needs. | A. check if the baby was awake. |
| B. talked before they were born. | B. cook her meal. |
| C. talked but no longer do now. | C. fetch fire for her meal. |
| D. talked only when they had problems. | D. steal the meat. |
| E. talked only when they saw evil. | E. watch over the baby. |

The woman knew her meat was stolen because

- A. her neighbour informed her.
- B. she hid somewhere in the room.
- C. she saw the new wife coming out of her room.
- D. the baby informed her.
- E. the meat was not the way she left it.

5. The king reasoned that if babies were allowed to continue talking, they could

- A. be too wise for their age.
- B. disgrace adults with their talks.
- C. disrespect adults.
- D. disturb their mothers.
- E. take over his kingdom.

The most suitable title for this passage could be

- A. Babies and their Mothers.
- B. The Embarrassed Woman.
- C. The Final Judgment.
- D. The Stolen Meat.
- E. Why Babies Don't Talk.

PASSAGE II

If you could look inside a television set or inside the walls of a house, you'd find a network of electric wires. This network doesn't puzzle electricians because each wire is a different colour to show what kind of wire it is. The different colours tell the electricians where each wire should be connected. We call this colour coding.

Colour coding helps many other people as well. People in business often use files with different coloured stickers on them. Each colour means something to the people using the files. Map makers also have colour codes. They use different colours for states or countries, so that you can see where one ends and another begins.

In the sport of archery, archers use bows to shoot arrows at targets. Each coloured circle on the target means a different number of points. An arrow in the golden bull's-eye in the centre of the target scores the highest number. The archers shoot a certain number of arrows at the target and then collect their arrows. Each archer recognizes his arrows by the colours painted on the shafts.

Colours can also be codes for players or points in other games such as chess, draughts, snooker, tiddlywinks, marbles and cards.
