## Types of Mediumship

---

### **Types of Mediumship:**

There are a number of ways that mediums interpret the information sent to them, and not all mediums work the same way or have the same gifts.

### **Clairvoyance:**

Clear Seeing                  Vision in the mind pictures.

**Clairvoyance** is the ability of being able to 'see' pictures, places, objects and colours sent from the spirit world. It is this particular gift that allows mediums to describe those they communicate with. This will also include symbolic images, which are visual clues from the communicating spirit.

### **Clairaudience:**

Clear Hearing                  Hearing the voices of spirit people.

**Clairaudience** is the mediums gift of hearing spirit voices, remembering of course that this is still an interpretation. They, for example, hear a voice in their ear, but it is also possible to hear by thought. Accents, age, tone and speed are all detectable.

### **Clairsentience:**

Feeling                          Being able to sense feelings

**Clairsentience** is the art of sensing and feeling the impressions of spirit, especially of letting the medium know how they passed. For example; they may be sent a sensation of pain around their heart area that might indicate the communicating spirit died of a heart attack. Pressure or breathing difficulty to the chest may also show a breathing problem, even joint pains can be felt. They can even include how the spirit person felt, emotions like euphoria, fear, panic or well-being can be interpreted.
